Collisions at the Crossroads Genevieve Carpio, 2019-04-16 There are few places where mobility has shaped identity as widely as the American West but some locations and populations sit at its major crossroads maintaining control over place and mobility labor and race In *Collisions at the Crossroads* Genevieve Carpio argues that mobility both permission to move freely and prohibitions on movement helped shape racial formation in the eastern suburbs of Los Angeles and the Inland Empire throughout the nineteenth and twentieth centuries By examining policies and forces as different as historical societies Indian boarding schools bicycle ordinances immigration policy incarceration traffic checkpoints and Route 66 heritage she shows how local authorities constructed a racial hierarchy by allowing some people to move freely while placing limits on the mobility of others Highlighting the ways people of color have negotiated their place within these systems Carpio reveals a compelling and perceptive analysis of spatial mobility through physical movement and residence California's Citrus Heritage Benjamin T. Jenkins, 2021 Since the first appearance of oranges at the Franciscan missions in the early 19th century citrus agriculture has been an inextricable part of California's heritage From the 1870s to the 1960s oranges and lemons were dominant features of the Southern California landscape The Washington navel orange introduced by homesteader Eliza Tibbets at Riverside in the 1870s precipitated the rise of a citrus belt stretching from Pasadena in the San Gabriel Valley to Redlands in San Bernardino County Valencia oranges dominated Orange County south of Los Angeles while lemons thrived in coastal settlements such as Santa Paula With the arrival of transcontinental railroads in the citrus heartland by the 1880s Californians had access to markets across the United States This was followed by the subsequent establishment of an impressive central organization in the form of the California Fruit Growers Exchange and oranges became the state's most lucrative crop Observers did not exaggerate when they dubbed the southern portion of the Golden State an orange empire **California and the Politics of Disability, 1850-1970** Eileen V. Wallis, 2023-03-31 This book explores the political legal medical and social battles that led to the widespread institutionalization of Californians with disabilities from the gold rush to the 1970s By the early twentieth century most American states had specialized facilities dedicated to both the care and the control of individuals with disabilities Institutions reflect the lived historical experience of many Americans with disabilities in this era Yet we know relatively little about how such state institutions fit into specific regional state or local contexts west of the Mississippi River how those contexts shaped how institutions evolved over time or

how regional institutions fit into the USA's contentious history of care and control of Americans with mental and developmental disabilities This book examines how medical social and political arguments that individuals with disabilities needed to be institutionalized became enshrined in state law in California through the creation of a bureaucracy of disability Using Los Angeles County as a case study the book also considers how the friction between state and county policy in turn influenced the treatment of individuals within such facilities Furthermore the book tracks how the mission and methods of such institutions evolved over time culminating in the 1960s with the birth of the disability rights movement and the complete rewriting of California's laws on the treatment and rights of Californians with disabilities This book is a must read for those interested in the history of California and the American West and for anyone interested in how the intersections of disability politics and activism shaped our historical understanding of life for Americans with disabilities **California 2008** Michael Nalepa, 2008 Includes information on hotels and resorts restaurants beaches walking and driving tours nighttime entertainment shopping and sights of interest **Fodor's 2009 Southern California** Fodor's, 2009-01-06 Detailed and timely information on accommodations restaurants and local attractions highlight these updated travel guides which feature all new covers a dramatic visual design symbols to indicate budget options must see ratings multi day itineraries Smart Travel Tips helpful bulleted maps tips on transportation guidelines for shopping excursions and other valuable features Original **Analysis of Public Support Relating to Control of the Western Pacific Railroad Company** Arthur C. Jenkins, 2023-07-10 As Southern California recovered from the collapse of the cattle industry in the 1860s the arrival of railroads attacked by newspapers as the greedy octopus and the expansion of citrus agriculture transformed the struggling region into a vast idealized and prosperous garden New groves of the latest citrus varieties and new towns like Riverside quickly grew directly along the tracks of transcontinental railroads The influx of capital industrial technology and workers especially people of color energized Southern California and tied it more closely to the economy and culture of the United States than ever before Benjamin Jenkins's Octopus's Garden argues that citrus agriculture and railroads together shaped the economy landscape labor systems and popular image of Southern California Orange and lemon growing boomed in the 1870s and 1880s while railroads linked the region to markets across North America and ended centuries of geographic isolation for the West Coast Railroads competed over the shipment of citrus fruits from multiple counties engulfed by the orange empire resulting in an extensive rail network that generated lucrative returns for grove owners and railroad businessmen in Southern California from the 1890s to the 1950s While investment from white Americans particularly wealthy New Englanders formed the financial backbone of the Octopus's Garden citrus and railroads would not have thrived in Southern California without the labor of people of color Many workers of color took advantage of the commercial

developments offered by railroads and citrus to economically advance their families and communities however these people also suffered greatly under the constant realities of bodily harm low wages and political and social exclusion Promoters of the railroads and citrus cooperatives touted California as paradise for white Americans and minimized the roles of non white laborers by stereotyping them in advertisements and publications These practices fostered conceptions of California s racial hierarchy by praising privileged whites and maligning the workers who made them prosper The Octopus s Garden continues to shape Southern Californians understanding of their past In bringing together multiple storylines Jenkins provides a complex and fresh perspective on the impact of citrus agriculturalists and railroad companies in Southern Californian history
