Rome Hannah Platts, 2019-11-28 Classicists have long wondered what everyday life was like in ancient Greece and Rome. How, for example, did the slaves, visitors, inhabitants, or owners experience the same home differently? And how did owners manipulate the spaces of their homes to demonstrate control or social hierarchy? To answer these questions, Hannah Platts draws on a diverse range of evidence and an innovative amalgamation of methodological approaches to explore multisensory experience: auditory, olfactory, tactile, gustatory, and visual in domestic environments in Rome, Pompeii, and Herculaneum for the first time from the first century BCE to the second century CE. Moving between social registers and locations from non-elite urban dwellings to lavish country villas, each chapter takes the reader through a different type of room and offers insights into the reasons, emotions, and cultural factors behind perception, recording, and control of bodily senses in the home, as well as their sociological implications. *Multisensory Living in Ancient Rome* will appeal to all students and researchers interested in Roman daily life and domestic architecture.

The City in History Lewis Mumford, 1961 Covers the city's development from ancient times to the modern age.

A Companion to Roman Italy Alison E. Cooley, 2016-01-05 *A Companion to Roman Italy* investigates the impact of Rome in all its forms: political, cultural, social, and economic upon Italy's various regions, as well as the extent to which unification occurred as Rome became the capital of Italy. The collection presents new archaeological data relating to the sites of Roman Italy. Contributions discuss new theories of how to understand cultural change in the Italian peninsula. Combines detailed case studies of particular sites with wider-ranging thematic chapters. Leading contributors not only make accessible the most recent work on Roman Italy but also offer fresh insight on long-standing debates.

Buried City, Unearthing Teufelsberg Benedict Anderson, 2017-07-06 Cities are built over the remnants of their past, buried beneath their present. We build on what has been built before, whether over foundations formalising previous permanency or over the temporal occupations of ground. But what happens when you shift a city when you dislodge its occupation of ground towards a new ground, bury it, and forget it? Focusing on Berlin's destruction during World War II and its reconstruction after the end of the war, this book offers a rethinking of how the practices of destruction and burial combine to reform the city through geography and how burying a city is intricately tied to forgetting, destruction, ruination, and trauma. Created from 25 million cubic meters of rubble produced during World War II, Teufelsberg Devil's Mountain is the exemplar of the destroyed city. Its critical journey is chronicled in combination with Berlin's seven other rubble hills and their connections to constructing, forgetting, through burial. Furthermore, the book investigates Berlin's sublime relation to Albert Speer's urban vision to rival the ancient cities of Rome and Athens through their now shared geographies of seven hills. Finally, there is a central focus on the role of the citizens who cleared Berlin's streets of rubble and the subsequent human relationships between people and ruins. This book is valuable reading for those interested in Architectural Theory, Urban Geography, Modern History, and Urban Design.

Life and Death in the Roman Suburb Allison L. C. Emmerson, 2020-05-24 Defined by borders both physical and conceptual, the Roman city stood apart as a concentration of

life and activity that was legally economically and ritually divided from its rural surroundings Death was a key area of control and tombs were relegated outside city walls from the Republican period through Late Antiquity Given this separation an unexpected phenomenon marked the Augustan and early Imperial periods Roman cities developed suburbs built up areas beyond their boundaries where the living and the dead came together in densely urban environments Life and Death in the Roman Suburb examines these districts drawing on the archaeological remains of cities across Italy to understand the character of Roman suburbs and to illuminate the factors that led to their rise and decline focusing especially on the tombs of the dead Whereas work on Roman cities has tended to pass over funerary material and research on death has concentrated on issues seen as separate from urbanism Emmerson introduces a new paradigm considering tombs within their suburban surroundings of shops houses workshops garbage dumps extramural sanctuaries and major entertainment buildings in order to trace the many roles they played within living cities Her investigations show how tombs were not passive memorials but active spaces that facilitated and furthered the social and economic life of the city where relationships between the living and the dead were an enduring aspect of urban life **Littell's Living Age** ,1923 **Eclectic Magazine, and Monthly Edition of the Living Age** John Holmes Agnew,Walter Hilliard Bidwell,1878 **The Literary Review** ,2005 **To the Land of the Living** Robert Silverberg,2015-07-28 The Hugo Award winning author returns to the mythical world of Gilgamesh the King in this adventurous sequel An enthralling quest The Times London The warrior king Gilgamesh part man part god is not only larger than life he is larger than death Trapped in the Afterworld a bizarre reality in which everyone who has ever died lives again only to die again and again in endless succession Gilgamesh sets out to find his lost friend Enkidu and fight his way back to the land of the living Along the way he encounters a rogue s gallery of figures from history literature and myth including H P Lovecraft and Robert E Howard and travels from the ancient city of Uruk to modern day Manhattan But the Afterworld is not so easily escaped *Naples : Past and Present* Arthur Hamilton Norway,1922
