Pragmatics and Literature Siobhan Chapman, Billy Clark, 2019-12-15 Pragmatics and Literature is an important collection of new work by leading practitioners working at the interface between pragmatic theory and literary analysis. The individual studies collected here draw on a variety of theoretical approaches and are concerned with a range of literary genres. All have a shared focus on applying ideas from specific pragmatic frameworks to understanding the production, interpretation and evaluation of literary texts. A full length introductory chapter highlights distinctions and contrasts between pragmatic theories but also brings out complementarities, shared aims and assumptions and ways in which different pragmatic theories can make different contributions to our understanding of literary texts. The book as a whole encourages a sense of coherence for the field and presents insights from various approaches for systematic comparison. Building on previous work by the editors, the contributors and others, it makes a significant contribution to the growing field of pragmatic literary stylistics.

Pragmatics Dawn Archer, Karin Aijmer, Anne Wichmann, 2012 Routledge Applied Linguistics is a series of comprehensive textbooks providing students and researchers with the support they need for advanced study in the core areas of English language and applied linguistics. Each book in the series guides readers through three main sections enabling them to explore and develop major themes within the discipline. Section A: Introduction establishes the key terms and concepts and extends readers' techniques of analysis through practical application. Section B: Extension brings together influential articles, sets them in context and discusses their contribution to the field. Section C: Exploration builds on knowledge gained in the first two sections, setting thoughtful tasks around further illustrative material. This enables readers to engage more actively with the subject matter and encourages them to develop their own research responses. Throughout the book, topics are revisited, extended, interwoven and deconstructed with the reader's understanding strengthened by tasks and follow-up questions. Pragmatics provides a broad view of pragmatics from a range of perspectives, gathering readings from key names in the discipline including Geoffrey Leech, Michael McCarthy, Thomas Kohnen, Joan Manes and Nessa Wolfson. It covers a wide variety of topics including speech acts, pragmatic markers, implicature, research methods in pragmatics, facework and politeness and prosody. It examines the social and cultural contexts in which pragmatics occurs, such as in cross-cultural pragmatics, silence, indirectness, forms of address, cultural scripts and pragmatics and power. The courtroom, police interaction, political interviews and doctor-patient communication. It uses a wide range of corpora to provide both illustrative examples and exploratory tasks. It is supported by a companion website at www.routledge.com/cw/archer featuring extra activities and additional data for analysis, guidance on undertaking corpus analysis and research, including how to create your own corpus with CMC and suggestions for further reading. Written by experienced teachers and researchers in the field, Pragmatics provides an essential resource for students and researchers of applied linguistics.

Pragmatics and Fiction Jon-K. Adams, 1985-01-01 This study is intended to design measures for ethnographic

description including speech acts in an etic instrumental approach oriented toward an analysis of the functions of communicative events in relation to the ongoing stream of behavior A revised taxonomy of speech acts is applied to an empirical corpus and is shown to produce a systematic set of behavioral measures which are potentially productive for cross cultural comparison

The Drama of the Messiah in Matthew 8 and 9 Solomon Pasala, 2008 In contrast to the other synoptic evangelists the author of Matthew proceeded differently in many respects Why did he modify the text so much and arrange ten miracle narratives one after the other at one stretch with minor interruptions Why did he place the so called miracle chapters immediately after the Sermon on the Mount Why did he enclose them between two summary statements on either side These are only some of the unanswered questions about chapters 8 and 9 of Matthew s Gospel Beginning with Aristotle s theory of the drama or tragedy the author suggests that the way the evangelist has reworked and reorganized the miracle narratives is similar to the structure of the classic drama By discovering the narrative strategies and the discourse aspect we are able to demonstrate how each episode corresponds to the different moments of a plot such as the initial situation inciting moment complication climax with suspense and finally resolution and denouement
