Medieval Irish Architecture and the Concept of Romanesque Tadhg O'Keeffe, 2024-02-28 This book presents a fresh perspective on eleventh and twelfth century Irish architecture and a critical assessment of the value of describing it and indeed contemporary European architecture in general as Romanesque

Medieval Irish Architecture and the Concept of Romanesque is a new and original study of medieval architectural culture in Ireland The book's central premise is that the concept of a Romanesque style in eleventh and twelfth century architecture across Western Europe including Ireland is problematic and that the analysis of building traditions of that period is not well served by the assumption that there was a common style Detailed discussion of important buildings in Ireland a place marginalised within the Romanesque model reveals the Irish evidence to be intrinsically interesting to students of medieval European architecture for it is evidence which illuminates how architectural traditions of the Middle Ages were shaped by balancing native and imported needs and aesthetics often without reference to Romanitas This book is for specialists and students in the fields of Romanesque medieval archaeology medieval architectural history and medieval Irish studies

The Medieval Culture of Disputation Alex J. Novikoff, 2013-10-09 Scholastic disputation the formalized procedure of debate in the medieval university is one of the hallmarks of intellectual life in premodern Europe Modeled on Socratic and Aristotelian methods of argumentation this rhetorical style was refined in the monasteries of the early Middle Ages and rose to prominence during the twelfth century Renaissance Strict rules governed disputation and it became the preferred method of teaching within the university curriculum and beyond In *The Medieval Culture of Disputation* Alex J Novikoff has written the first sustained and

comprehensive study of the practice of scholastic disputation and of its formative influence in multiple spheres of cultural life Using hundreds of published and unpublished sources as his guide Novikoff traces the evolution of disputation from its ancient origins to its broader impact on the scholastic culture and public sphere of the High Middle Ages Many examples of medieval disputation are rooted in religious discourse and monastic pedagogy Augustine's inner spiritual dialogues and Anselm of Bec's use of rational investigation in speculative theology laid the foundations for the medieval contemplative world The polemical value of disputation was especially exploited in the context of competing Jewish and Christian interpretations of the Bible Disputation became the hallmark of Christian intellectual attacks against Jews and Judaism first as a literary genre and then in public debates such as the Talmud Trial of 1240 and the Barcelona Disputation of 1263 As disputation filtered into the public sphere it also became a key element in iconography liturgical drama epistolary writing debate poetry musical counterpoint and polemic The Medieval Culture of Disputation places the practice and performance of disputation at the nexus of this broader literary and cultural context

Priests of the Law Thomas J. McSweeney, 2019-11-21 Priests of the Law tells the story of the first people in the history of the common law to think of

themselves as legal professionals In the middle decades of the thirteenth century a group of justices working in the English royal courts spent a great deal of time thinking and writing about what it meant to be a person who worked in the law courts This book examines the justices who wrote the treatise known as Bracton Written and re written between the 1220s and the 1260s Bracton is considered one of the great treatises of the early common law and is still occasionally cited by judges and lawyers when they want to make the case that a particular rule goes back to the beginning of the common law This book looks to Bracton less for what it can tell us about the law of the thirteenth century however than for what it can tell us about the judges who wrote it The judges who wrote Bracton Martin of Pattishall William of Raleigh and Henry of Bratton were some of the first people to work full time in England s royal courts at a time when there was no recourse to an obvious model for the legal professional They found one in an unexpected place they sought to clothe themselves in the authority and prestige of the scholarly Roman law tradition that was sweeping across Europe in the thirteenth century modelling themselves on the jurists of Roman law who were teaching in European universities In Bracton and other texts they produced the justices of the royal courts worked hard to ensure that the nascent common law tradition grew from Roman Law Through their writing this small group of people working in the courts of an island realm imagined themselves to be part of a broader European legal culture They made the case that they were not merely servants of the king they were priests of the law

Plotting Gothic Stephen Murray,2015-03-06 A historian of medieval art and architecture with a rich appreciation of literary studies Stephen Murray brings all those fields to bear on a new approach to understanding the great Gothic churches of the twelfth and thirteenth centuries Plotting Gothic positions the rhetoric of the Gothic as a series of three interlocking plots a spatial plot tied to the material construction of the churches a social plot stemming from the collaborative efforts that made Gothic output possible and a rhetorical plot involving narratives that treat the churches as objects of desire Drawing on the testimony of three witnesses involved in church building Abbot Suger of Saint Denis Gervase of Canterbury and the image maker Villard de Honnecourt and a range of secondary sources Murray traces common patterns in the way medieval buildings were represented in words and images Our witnesses provide vital information about the way the great churches of Gothic were built and the complexity of their meanings Taking a fresh approach to Gothic architecture Plotting Gothic offers an invigorating new way to understand some of the most lasting achievements of the medieval era *Masons, Tricksters and Cartographers* David Turnbull,2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys *The World of the Crusades* Andrew Holt,2019-06-05 Unlike traditional

Kemeny, 2013-03-11 While debates abound today over the cost purpose and effectiveness of higher education often lost in this conversation is a critical question Should higher education attempt to shape students moral and spiritual character in any systematic manner as in the past or focus upon equipping students with mere technical knowledge Faith Freedom and Higher Education argues that Christianity can still play an important role in contemporary American higher education George M Marsden D G Hart and George H Nash among its authors analyze the debate over the secularization of the university and the impact of liberal Protestantism and fundamentalism on the American academy during the twentieth century Contributors also assess how the ideas of Dorothy Sayers C S Lewis Wendell Berry and Allan Bloom can be used to improve Christian higher education Finally the volume examines the contributions Christian faith can make to collegiate education and outlines how Christian institutions can preserve their religious mission while striving for academic excellence

A History of the Western Educational Experience Gerald L.

Gutek, 2022-02-15 This comprehensive volume identifies and analyzes the significant ideas and institutions that shaped the Western educational heritage. The author examines how worldwide events have impacted education in Europe, North America, and beyond. The third edition incorporates fresh material about the ancient world, European exploration and colonization of North America and India, as well as updated chapters on education in the United Kingdom, France, Germany, and Russia. This edition has an expanded treatment of Carl Jung, a new section on Margaret Naumburg and her Walden School, and enhanced analysis of many other theorists. It concludes with broadened coverage of nineteenth, twentieth, and twenty-first century American education, including many educators new to the third edition. Each chapter contains a new feature: Reflection, Discussion, and Research. From Plato and Aristotle to John Dewey, leading educators raised perennial concepts about education and truth, meaning, and value that remain relevant today. In the progression from antiquity to the present, some issues are marked by change and others by continuity, all of which are important to consider, discuss, and research further.

Technology, Skills and the Pre-Modern Economy in the East and the West, 2013-05-30 Technology, Skills, and the Pre-Modern Economy investigates how technological skills and knowledge were reproduced and disseminated in the advanced agrarian societies of China, India, Russia, and Europe in the centuries before the Industrial Revolution. The book offers regional surveys of Europe, China, and India, as well as comparative studies of building, porcelain manufacturing, instrument making, printing, and shipbuilding. The authors engage with the ongoing debate about the great divergence between Asia and Europe and its possible causes. Technology has so far had a minor role in that debate. This book is bound to change that through the bold claims made by various contributors. Contributors are Karel Davids, S. R. Epstein, Gijs Kessler, Jan Lucassen, Christine Moll, Murata Patrick, O'Brien, Kenneth Pomeranz, Maarten Prak, Tirthankar Roy, Richard Unger, and Jan Luiten van Zanden.

The Envy of Angels C. Stephen Jaeger, 2013-08-31 Before the rise of universities, cathedral schools educated students in a course of studies aimed at perfecting their physical presence, their manners, and their eloquence. The formula of cathedral schools was *letters and manners* (*litterae et mores*), which asserts a pedagogic program as broad as the modern letters and science. The main instrument of what C. Stephen Jaeger calls charismatic pedagogy was the master's personality, his physical presence radiating a transforming force to his students. In *The Envy of Angels*, Jaeger explores this intriguing chapter in the history of ideas and higher learning and opens a new view of intellectual and social life in eleventh and early twelfth-century Europe.
