Often In Different Landscapes:

Landscape Ecology in Action A. Farina, 2012-12-06 In my office I am encased in bookshelves which hold an accumulation of literature on ecology that represents the papers and books over the last 50 years My students enjoy rummaging through this collection because it contains a record of the history of ecology and is full of surprises Some of the most recent material pertains to landscape ecology a subject that literally emerged fully active at the Veldhoven International Congress organized by the landscape ecologists of The Netherlands in 1981 The subject has developed quickly It has one or more journals which publish short works It has a series of text books And it has just begun a series on monographs One of the textbooks in landscape ecology is titled *Principles and Methods in Landscape Ecology* and was written by the Italian ecologist Almo Farina in 1998 My students like this text especially well because it is direct to the point and comprehensive Farina is on loan much of the time In the present volume Almo Farina again addresses the subject of Landscape Ecology but from a different perspective than he took in his textbook *Landscape in Action* focuses on the application of the principles and concepts to problem solving The two books make a pair with the first technical and conceptual and the second applied to problems of land and water at large scale

Strategic Landscape Monitoring for the Nordic Countries Geoff Groom, Tim Reed, 2001

Landscape experiences as a cultural ecosystem service in a Nordic context Lindhjem, Henrik, Reinvang, Rasmus, Zandersen, Marianne, 2015-08-19 Cultural ecosystem services in the form of experiences derived from landscapes are potentially important but often overlooked Given the large and unprecedented landscape changes many of the Nordic countries are undergoing there is a need to find ways of including people's preferences and the value of landscape impacts in policy assessments and decision making processes The project aim has been to synthesize knowledge about the magnitude and value of landscape experiences and investigate current practices and examples of how landscape impacts are incorporated or not in policy assessments and decision making contexts in the Nordics The literature demonstrates potentially high unaccounted welfare loss from landscape change We find clear weaknesses in current practices that a second phase will try to address The project was carried out by Vista Analysis in Oslo and Department of Environmental Science at Aarhus University from 2014-15

Current Trends in Landscape Research Lothar Mueller, Frank Eulenstein, 2019-11-13 This book presents definitions key concepts and projects in landscape research and related areas such as landscape science and landscape ecology addressing and characterising the international role status challenges future and tools of landscape research in the globalised world of the 21st century The book brings together views on landscapes from leading international teams and emerging authors from different scientific disciplines and regions of the globe It describes approaches for achieving sustainability and for handling the multifunctionality of landscapes and includes international case studies demonstrating the great potential of landscape research to provide partial sustainable solutions while developing cultural landscapes and protecting semi natural landscapes It is intended for scientists from various disciplines as well as

informed readers dealing with landscape policies planning evolvement management stewardship and conservation

Landscape Experiences as a Cultural Ecosystem Service in a Nordic Context: Concepts, Values and Decision-making

Rasmus Reinvang, Marianne Zandersen, Henrik Lindhjem, 2015 Cultural ecosystem services in the form of experiences derived from landscapes are potentially important but often overlooked Given the large and unprecedented landscape changes many of the Nordic countries are undergoing there is a need to find ways of including people's preferences and the value of landscape impacts in policy assessments and decision making processes The project aim has been to synthesize knowledge about the magnitude and value of landscape experiences and investigate current practices and examples of how landscape impacts are incorporated or not in policy assessments and decision making contexts in the Nordics The literature demonstrates potentially high unaccounted welfare loss from landscape change We find clear weaknesses in current practices that a second phase will try to address The project was carried out by Vista Analysis in Oslo and Department of Environmental Science at Aarhus University from 2014-15

Landscapes, Identities and Development
