Yellow Fever, Race, and Ecology in Nineteenth-Century New Orleans Urmi Engineer Willoughby,2017-12-13 Through the innovative perspective of environment and culture Urmi Engineer Willoughby examines yellow fever in New Orleans from 1796 to 1905 Linking local epidemics to the city s place in the Atlantic world Yellow Fever Race and Ecology in Nineteenth Century New Orleans analyzes how incidences of and responses to the disease grew out of an environment shaped by sugar production slavery and

urban development Willoughby argues that transnational processes including patterns of migration industrialization and imperialism contributed to ecological changes that enabled yellow fever carrying *Aedes aegypti* mosquitoes to thrive and transmit the disease in New Orleans challenging presumptions that yellow fever was primarily transported to the Americas on slave ships She then traces the origin and spread of medical and popular beliefs about yellow fever immunity from the early nineteenth century contention that natives of New Orleans were protected to the gradual emphasis on race as a determinant of immunity reflecting social tensions over the abolition of slavery around the world As the nineteenth century unfolded ideas of biological differences between the races calcified even as public health infrastructure expanded and race continued to play a central role in the diagnosis and prevention of the disease State and federal governments began to create boards and organizations responsible for preventing new outbreaks and providing care during epidemics though medical authorities ignored evidence of black victims of yellow fever Willoughby argues that American imperialist ambitions also contributed to yellow fever eradication and the growth of the field of tropical medicine U S commercial interests in the tropical zones that grew crops like sugar cane bananas and coffee engendered cooperation between medical professionals and American military forces in Latin America which in turn enabled public health campaigns to research and eliminate yellow fever in New Orleans A signal contribution to the field of disease ecology *Yellow Fever Race and Ecology in Nineteenth Century New Orleans* delineates events that shaped the Crescent City's epidemiological history shedding light on the spread and eradication of yellow fever in the Atlantic World **Kirkland Source Book of Records**, 1988 **God, Ghosts, and Grannies** Shirley Booth-Byerly, 2018-10-11 Shirley Booth Byerly has been addicted to the study of genealogy since childhood she loves the never ending battle of discovering subtle links possibilities impossibilities and misconceptions In *God Ghosts and Grannies* she tells the story of her family where they came from and how they settled in South Alabama and Northwest Florida Telling the events as literary nonfiction and taking genealogy to a new level her story shares insights from six generations six unique individuals each viewing life from slightly skewed rose colored glasses Shirley melds humor drama and a living experience with research resources and revelations *Gods Ghosts and Grannies* narrates a story of people's lives their hopes their dreams and the realities they faced while struggling working and tending their homes the same homes that convey tranquil memories laughter sunshine and contentment memories forever gone when no one is left to tell the stories or no one cares to listen **Deep South Genealogical Quarterly**, 1996 *The New England Historical and Genealogical Register*, 1984 Beginning in 1924 Proceedings are incorporated into the Apr no **The Family Tree Resource Book for Genealogists** Sharon DeBartolo Carmack, Erin Nevius, 2004-12 Provides genealogists with research summaries maps and timelines for every U S state county level data that can be utilized to acquire most genealogical records and listings of contact information Web sites libraries and genealogical and historical societies **The American Genealogist**, 1989 **New Arrivals in American Local History and Genealogy, Quarterly List** Sutro Library, 1985
