Clark,2015-06-25 Excerpt from The Philosophy of Wealth Economic Principles Newly Formulated In a series of articles in the New Englander commenced ten years ago I endeavored to contribute a share toward the reformulating of certain leading principles of economic science The traditional system was obviously defective in its premises These were assumptions rather than facts and the conclusions deduced from them were for that reason uncertain The assumed premises were at certain points at variance with facts and the conclusions were to that extent erroneous The better elements of human nature were a forgotten factor in certain economic calculations the man of the scientific formula was more mechanical and more selfish than the man of the actual world A degraded conception of human nature vitiated the theory of the distribution of wealth The prevalent theory of value started with a misconception of utility and of the part which it plays in exchanges Economic science in general found no adequate place for the intellectual activities of men and made no important use of the fact that society is an organism to be treated as a unit in the discussion of many processes affecting wealth About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Philosophy of Wealth** John B.
