*Asian Revitalization* Katie Cummer, 2021-01-11 Adaptive reuse refers to reusing an old building for a purpose other than which it was originally built or designed This conservation approach has become increasingly popular around the world However there are few publications that focus on its application in Asia This book fills this gap by looking at both unique and shared aspects of adaptive reuse in three Asian urban centers Hong Kong Shanghai and Singapore Building on government policy documents and extensive field work this book contextualizes adaptive reuse in each city and reveals the impetus behind a wide range of projects from revitalization in Hong Kong commercial development in Shanghai to community building in Singapore The introductory chapter sets adaptive reuse within an international perspective noting salient differences and similarities between Asia and other parts of the world It also anchors the discussion within a regional perspective focusing on the similarities and differences between Hong Kong Shanghai and Singapore Each of the following four essays addresses a specific topic about adaptive reuse including its relationship to urban development and sustainability how it benefits heritage buildings and how it reveals best practices in heritage conservation in Asia The subsequent three essays one for each city supplemented with timelines set out a clear framework for understanding the city specific case studies that follow the essays Afterwards fifteen representative projects across the three cities are presented as in depth case studies The pairing of essays and case studies provides a detailed understanding of each city's approach to adaptive reuse in the twenty first century a time when the need for sustainable development solutions are at the forefront Intended for classroom use and professional readership this book will be of considerable value in Asia as well as elsewhere providing material for stimulating and worthwhile discussion

*Asian Revitalization* is a highly practical and accessible volume on the long established conservation practice of adaptive reuse in East Asia Its focus on real life issues examples and challenges posed by revitalization programs in the region is extremely relevant to researchers and practitioners in architectural conservation urban design and urban studies Miles Glendinning University of Edinburgh Scotland This is a superb well documented and original book written by some of the best known and highly respected authors in the field of heritage conservation The carefully examined case studies illustrate a wide variety of solutions that highlight the work of some of the best minds of the next generations Alastair Kerr University of Victoria Canada This is a most interesting set of essays informative and thought provoking The best way to save any heritage building is by keeping it in beneficial use and how to achieve this in a sensitive manner is what these essays are about They should be vital reading for anyone considering an adaptive reuse project in Asia Michael Morrison Purcell UK With cultural heritage firmly ensconced in the global development agendas of the United Nations this well grounded volume draws upon the experience of Hong Kong SAR Shanghai and Singapore to demonstrate to scholars and practitioners alike how historic

properties can be sustained through savvy adaptive reuse in the midst of tremendous urban redevelopment pressures  
Montira Horayangura Unakul UNESCO Bangkok Thailand      The Red Men Matthew de Abaitua,2017-11-07 The boundaries between the real and the virtual break down in this literary SF thriller from the author of If Then and The Destructives Once Nelson was a radical journalist but now he works for Monad the corporation that makes the Dr Easys the androids which police London s streets They also make the Red Men versions of real people imagined by a shadowy artificial intelligence and they re looking to expand the program Nelson creates Redtown a digital version of a suburb where the deepest secrets and desires of its citizens can be catalogued and studied But the project s goals are increasingly authoritarian and potentially catastrophic As the boundaries between Redtown and the real world break down and revolution against the Red Men is imminent Nelson is forced to choose between the corporation and his family File Under Science Fiction Welcome to Redtown Singularity Satire You Are Data Dr Easy      The Cherokee People Thomas E. Mails,1992 This book depicts the Cherokees ancient culture and lifestyle their government dress and family life Mails chronicles the fundamentals of vital Cherokee spiritual beliefs and practices their powerful rituals and their joyful festivals as well as the story of the gradual encroachment that all but destroyed their civilization      I Am That: Talks on the Isa Upanishad OSHO,2023-06-20 Osho goes into the depths of life s eternal questions while speaking on the sutras of the Isa Upanishad the most ancient words of wisdom available to mankind For over 35 years Osho spoke to international audiences of seekers addressing their essential questions and concerns The international press calls him A 21st Century Prophet and an oracle of modern times His books and audio lectures are international bestsellers Osho himself says that he is neither a prophet nor a philosopher he is simply sharing his own experience The Sunday Times of London described him as one of the 1000 makers of the 20th century and American author Tom Robbins has called him the most dangerous man since Jesus Christ both comments reflecting the profound influence of his revolutionary approach to the science of inner transformation Spoken with authority clarity sharpness and humor his insights address both the timeless and timely concerns that tend to escape our notice in the clamor and overload of daily life      **Sioux Me** Alan Fletcher M. S,Alan Fletcher F.R.C.S(Eng) F.A.C.S,2009-03 I was a Family Doctor Surgeon on the Fort Peck Indian reservation in Montana for four years in 1962 6 This book is a collection of stories about my experiences mainly with the Sioux Indians      Social Organization and Social Usages of the Indians of the Creek Confederacy John Reed Swanton,1928      **Social Order and Political Change** Duane Champagne,1992-07-01 Under what conditions can democratic governments be formed and become stable The author addresses this question in a unique way that brings sociological and political theory to bear on the study of traditional societies long the preserve of historians and anthropologists By examining in detail the history of four American Indian societies the Cherokee the Choctaw the Chickasaw and the Creek the author documents a general theory of politics and constitutional government The four societies present an opportunity to study the process of democratic institution building in a controlled comparative historical context

The societies were subject to similar geopolitical relations with the United States they were incorporated into the same sequence of world economic system relations initially fur trade and then the cotton market they experienced the emergence of class structures and they all produced some form of constitutional democracy The Cherokee however adopted a stable constitutional government earlier and with less coercion than the other three nations Why was this so With the aid of comparative analysis the author finds the answer in the Cherokee differentiation of politics from the nationally and religiously ordered clan system This set of institutional relations allowed the Cherokee to maintain a strong sense of social solidarity while tolerating conflict increased political differentiation and formation of a political nationality The other three societies were either less differentiated or less socially unified They formed their constitutional governments thirty to forty years later than the Cherokee and with more internal political coercion and in the Creek case with less political stability The formation and stabilization of democratic state governments is a major issue in such contemporary phenomena as political change in Third World nations and the transformation of the governments of Eastern Europe The four case studies presented in this book form the basis of a new and powerful theoretical argument for understanding historical patterns of democratic change political stability and the relations of political power

Bauer,2010-07-22 The ceque system of Cusco the ancient capital of the Inca empire was perhaps the most complex indigenous ritual system in the pre Columbian Americas From a center known as the Coricancha Golden Enclosure or the Temple of the Sun a system of 328 huacas shrines arranged along 42 ceques lines radiated out

toward the mountains surrounding the city This elaborate network maintained by ayllus kin groups that made offerings to the shrines in their area organized the city both temporally and spiritually From 1990 to 1995 Brian Bauer directed a major project to document the ceque system of Cusco In this book he synthesizes extensive archaeological survey work with archival research into the Inca social groups of the Cusco region their land holdings and the positions of the shrines to offer a comprehensive empirical description of the ceque system Moving well beyond previous interpretations Bauer constructs a convincing model of the system s physical form and its relation to the social political and territorial organization of Cusco
