Holland, 2020-06-11 Literature has never looked weirder full of images colors gadgets and footnotes and violating established norms of character plot and narrative structure Yet over the last 30 years critics have coined more than 20 new realisms in their attempts to describe it What makes this decidedly unorthodox literature realistic And if it is then what does realism mean anymore Examining literature by dozens of writers and over a century of theory and criticism about realism The Moral Worlds of Contemporary Realism sorts through the current critical confusion to illustrate how our ideas about what is real and how best to depict it have changed dramatically especially in recent years Along the way Mary K Holland guides the reader on a lively tour through the landscape of contemporary literary studies taking in metafiction ideology posthumanism postmodernism and poststructuralism with forays into quantum mechanics new materialism and Buddhism as well to give us entirely new ways of viewing how humans use language to make sense of and to make the world Aquatic Mites from Genes to Communities Heather Proctor, 2013-03-09 Although the ancestral home of chelicerates was the sea the vast majority of modern species live on land Most students of spiders and mites also restrict themselves to terrestrial habitats However a surprising number of mites Arachnida Acari have returned to a watery existence Approximately 7000 species from the Mesostigmata Astigmata Oribatida and especially the Prostigmata now live in marine and freshwater habitats In Aquatic Mites a dozen chapters explore the distribution ecology behavior genetics and evolution of the most diverse of these astonishing arachnids The results of these studies raise as many interesting questions as they answer and should provoke more investigations of the biology of freshwater and marine Acari Contemporary World Narrative Fiction and the Spaces of Neoliberalism Michael K. Walonen, 2016-04-26 This book is a transnational study of how contemporary fiction writers from the United States and Canada to Nigeria to India to Dubai have conceptualized the emergent social spaces of the diverse corners of the neoliberal world system Over the span of the past three to four decades free market economic policies have been sold to or pushed upon every society on the globe in some way shape or form The upshot of this has been a world system structured in terms of a vast shift of power and resources from government to private enterprise dwindling civic life replaced by rising consumerism an emerging oligarchic rentier class large segments of population faced with meager material conditions of existence and few prospects of socio economic mobility and a looming sense of a near future dominated by further economic collapses and mounting social strife This book analyses a wide cultural array of some of the most poignant narrative engagements with neoliberalism in its various localized manifestations throughout the world
