**Reel Latinxs** Frederick Luis Aldama, Christopher González, 2019-09-24 Latinx representation in the popular imagination has infuriated and befuddled the Latinx community for decades. These misrepresentations and stereotypes soon became as American as apple pie. But these cardboard cutouts and examples of lazy storytelling could never embody the rich traditions and histories of Latinx peoples. Not seeing real Latinxs on TV and film reels as kids inspired the authors to dive deep into the world of mainstream television and film to uncover examples of representation good and bad. The result is a riveting ride through televisual and celluloid reels that make up mainstream culture. As pop culture experts Frederick Luis Aldama and Christopher González show, the way Latinx peoples have appeared and are still represented in mainstream TV and film narratives is as frustrating as it is illuminating. Stereotypes such as drug lords, petty criminals, buffoons, and sexed-up lovers have filled both small and silver screens and the minds of the public. Aldama and González blaze new paths through Latinx cultural phenomena that disrupt stereotypes, breathing complexity into real Latinx subjectivities and experiences. In this grand sleuthing sweep of Latinx representation in mainstream TV and film that continues to shape the imagination of U.S. society, these two Latinx pop culture authorities call us all to scholarly action.

**Technology Innovations for Behavioral Education** Mary Banks Gregerson, 2011-05-03 Behavioral and technological innovation has a special place in the future of graduate and medical education, both for students and for educators. A new multi-media pedagogy offers innovative techniques and technologies drawing widely upon behavioral science. The psychology of multi-media education maximizes learning by involving many different sensory modalities. Although multi-media has long meant use of film and other electronic modality adjuncts like Powerpoint, newer technologies expand these horizons further. Now multi-media pedagogy means not only newer technologies but also newer and different education techniques. This book describes psychology innovation currently making educational settings competent and competitive. Student choice rules in education today. The technologically driven environment produces students whose preference is incumbent on electronic research means. Besides using these tools themselves, students thirst for multi-media pedagogy in the classroom, online, and on campus. It is therefore teachers who close the digital divide between generations in order to educate effectively. Approaches using new technologies and
