Savignon, 2008-10-01 The emergence of English as a global language along with technological innovations and the growing need for learner autonomy is changing language teaching rapidly and profoundly With these changes come new demands and challenges for teaching education programs This authoritative collection of writings highlights some of the best work being done today in the United States and abroad to make communicative competence an attainable goal The contributors examine what has come to be known as communicative language teaching or CLT from the perspectives of teachers and teacher educators The book documents current reform initiatives in Japan the United States Hong Kong Taiwan and continental Europe to provide a global perspective on language teaching for communicative competence Four major themes recur throughout the volume the multifaceted nature of language teaching the highly contextualized nature of CLT the futility of defining a native speaker in the postcolonial postmodern world and the overwhelming influence of high stakes tests on language teaching The book is a useful and valuable tool for language teachers teacher educators and policymakers Transverse Disciplines Simone Pfleger, Carrie Smith, 2022-08-31 For at least a decade university foreign language programs have been in decline throughout the English speaking world As programs close or are merged into large multi language departments disciplines such as German studies find themselves struggling to survive Transverse Disciplines offers an overview of the current research on the humanities and the academy at large and proposes creative and courageous ideas for the university of the future Using German studies as a case study the book examines localized academic work in Australia Canada the United Kingdom and the United States in order to model new ideas for invigorated thinking beyond disciplinary specificity university communities and entrenched academic practices In essays that are theoretical speculative experimental

and deeply personal contributors suggest that German studies might do better to stop trying to protect existing national and disciplinary arrangements. Instead, the discipline should embrace feminist, queer, anti-racist, and decolonial academic practices and commitments, including community-based work, research creation, and scholar activism. Interrogating the position of researchers, teachers, and administrators inside and outside academia, *Transverse Disciplines* takes stock of the increasingly tenuous position of the humanities and stakes a claim for the importance of imagining new disciplinary futures within the often restrictive and harmful structures of the academy.

Transforming World Language Teaching and Teacher Education for Equity and Justice Beth Wassell, Cassandra Glynn, 2022-04-29 This edited book expands the current scholarship on teaching world languages for social justice and equity in K-12 and postsecondary contexts in the US. Over the past decade, demand has been growing for a more critical approach to teaching languages and cultures; in response, this volume brings together a group of scholars whose work bridges the fields of world language education and critical approaches to education. Within the current US context, the chapters address the following key questions: 1. How are pre-service or in-service world language teachers/professors embedding issues, understandings, or content related to social justice, human rights, access, critical pedagogy, and equity into their teaching and curriculum? 2. How are teacher educators preparing language teachers to teach for social justice, human rights, access, and equity?

Handbook for Arabic Language Teaching Professionals in the 21st Century Kassem Wahba, Zeinab A. Taha, Liz England, 2014-06-03 This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters, authored by leaders in the field, are organized around nine themes: Background of Arabic Language Teaching; Contexts of Arabic Language Teaching; Communicative Competence in Arabic; The Learners; Assessment; Technology Applications; Curriculum Development; Design and Models; Arabic Language Program Administration and Management; and Planning for the Future of Arabic Language Learning and Teaching. The *Handbook for Arabic Language Teaching Professionals in the 21st Century* will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields; dialogue that will

contribute to creating new models for curriculum and course design materials and assessment tools and ultimately better instructional effectiveness for all Arabic learners everywhere in both Arabic speaking and non Arabic speaking countries

Proficiency Betty Lou Leaver, Boris Shekhtman, 2002-09-26 This 2002 book examines approaches to teaching students making the transition from advanced or superior proficiency in a foreign language to near native ability

Lasting Change in Foreign Language Education John L. Watzke, 2003-03-30 Lasting Change in Foreign Language Education presents a historical account of foreign language in general education The author examines the struggle of this subject discipline to align with the changing mission of secondary education as it emerged as the predominant institution enrolling students in the study of second languages This 100 year history suggests trends persistent across major periods of reform to explain current problems in the expansion of learning opportunities in foreign language Included is a complete database of education statistics on foreign language education and national and state education law from 1899 to the present Analysis of this data is presented in multiple formats to describe the historical capacity of the education system to achieve reform A review of contemporary standards based education initiatives in states and school districts similarly serves to reflect how historical trends continue to restrict change Concise policy implications are suggested as a means to address historical precedence and the greater mission of general education in the development of education policy and its transformation into practice Policy development must include a greater understanding of the historical development of foreign language in general education This vital link has been lacking in the past century as foreign language has struggled to realign itself with the changing mission of general education For example there are distinct curricular differences between a general education for all students and one for leadership and higher education Only the latter makes room for solid foreign language education In

addition the study of foreign language has remained primarily a beginning level endeavor for the majority of students over the past century This trend results in significant pressure on the beginning level curriculum particularly during periods of reform to provide multiple academic outcomes in education
