Humans are social animals and change is a social process To understand this social process and explain the thoughts feelings and behaviours of individuals knowledge of how the presence of others influences people is crucial In this regard bias is a concept with a lot of potential Because cognitive and social biases influence human thinking feelings and behaviour these provide insights and knowledge that are helpful if not essential for the field of organizational behaviour and change management The preceding statements may seem obvious and self evident but practice as well as science show that they are neither Organizational Behaviour and Change Management The Impact of Cognitive and Social Bias aims at unleashing the potential of cognitive and social biases to develop a more effective change management theory and practice To do so we analysed and assessed thousands of scientific articles The most prominent biases are structured by using a practical and comprehensible framework based on five core social motives belonging understanding controlling trusting and self enhancing With its evidence based systematic and integrative approach this book provides scientists and practitioners in the field of organizational behaviour and change management with the best available evidence linking biases to organizational behaviour and change and further enriching the field of change management *The Role of Reflection in Managerial Learning* Marilyn W. Daudelin,Kent W. Seibert,1999-09-30

Challenging work experiences are the richest source of learning for today s managers Yet lessons embedded in these experiences are not always obvious This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection Today s workplace demands continual learning which in turn requires reflection While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection Both modes involve processes of intentional inquiry Different forces are necessary to stimulate each type of reflection Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes Accordingly a holistic model that integrates

active and proactive reflection is presented This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection It is also relevant to practitioners and companies who desire to enhance what their managers learn from their workplace experience *Organizing Reflection* Michael Reynolds, 2017-03-02 Through a series of leading edge contributions from pre eminent international scholars in the field *Organizing Reflection* makes a stimulating and distinctive contribution to the study of reflection By doing so it offers the first shift from the individual reflective practitioner to processes of collective and public reflection The unique and varied contributions focus on the development of notions such as public reflection collective reflection and critical reflection In doing so they provide critical insights into new thinking and approaches to the role of reflection in organizations as well as the conceptualization and delivery of learning and change *Organizing Reflection* will be of interest to scholars working in business professional management and organization studies to human development academics and to scholarly practitioners in organizations
