Reflections For The Effective Capital Campaigner:

Reflections for the Effective Capital Campaigner Jim Norvell, 2001 The capital campaign is a statement of will but it had better be a statement of potential A successful campaign has far greater ramifications than the organization's leadership ever foresees The successful campaign creates a new organization not just a bigger one an organization that recognizes its past only as a developmental phase of what is to become The bar is raised but the confidence level jumps even while being pressed to keep pace with ever escalating expectations Capital campaigns are for achievers not the mere hopeful With those words as a sendoff Norvell proceeds to lay out some basic insights about how organizations behave in a capital campaign and how to get them to operate better His sage observations are linked with insightful and sometimes witty quotations from the famous and nearly so

Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 *Other People's Money* John Kay, 2015-09-22 The finance sector of Western economies is too large and attracts too many of the smartest college graduates Financialization over the past three decades has created a structure that lacks resilience and supports absurd volumes of trading The finance sector devotes too little attention to the search for new investment opportunities and the stewardship of existing ones and far too much to secondary market dealing in existing assets Regulation has contributed more to the problems than the solutions Why What is finance for John Kay with wide practical and academic experience in the world of finance understands the operation of the financial sector better than most He believes in good banks and effective asset managers but good banks and effective asset managers are not what he sees In a dazzling and revelatory tour of the financial world as it has emerged from the wreckage of the 2008 crisis Kay does not flinch in his criticism we do need some of the things that Citigroup and Goldman Sachs do but we do not need Citigroup and Goldman to do them And many of the things done by Citigroup and Goldman do not need to be done at all The finance sector needs to be reminded of its primary purpose to manage other people's money for the benefit of businesses and households It is an aberration when some of the finest mathematical and scientific minds are tasked with devising algorithms for the sole purpose of exploiting the weakness of other algorithms for computerized trading in securities To travel further down that road leads to ruin A Financial Times Book of the Year 2015 An Economist Best Book of the Year 2015 A Bloomberg Best
