Reflections on Mind and the Image of Reality Jason Brown,2017-05-24 This collection of brief essays and still briefer commentaries is a personal reflection on some topics that have been thematic in the development of my theoretical work These essays are not meant to extend the theory into yet uncharted territory but rather to draw out some of its implications for clinical neuroscience philosophy of mind and everyday life The point of view guiding these reflections can be found in prior works but the discerning reader will not fail to see a departure from current models of mind and brain based on circuit board diagrams modular and computational theories that conflict with a processual account in which the mind brain is more like a living organism This perspective which is often at odds with common sense and folk psychology has particular relevance to our concepts of the self the inner life subjective time adaptive process and the world represented in perception

Reflections on the World of Human Inspirations Gabriel Bekö,2024-01-11 Inspiration is the initial spark that puts us on track towards our beliefs attitudes and actions It partly defines who we are and whom we will become But what are the sources of our inspirations what governs them how do they take shape in our lives and how are our lives shaped by them Can they be right and wrong and do we have the power to control them This book provides an analysis of the historical geographical and cultural aspects of those countless moments that ignite our passions guide our efforts or cause the lack of both Through the study of human inspirations the author elaborates a variety of issues including current societal political and global challenges spirituality human character individualism education as well as the contrast between what used to be the political East and West communism and capitalism The book offers an intriguing look at the inflation of inspirations in our rapidly changing societies and its global implications It fuses numerous fields to offer a refined view of the world and ourselves in it Do advanced societies consist of advanced individuals or is it time to reassess our values redefine our principles and seek inspirations that dare to question the status quo and introduce us to a category of dignity that moves us closer to a truly advanced world
