Reflections of Reality in Japanese Art, 1983      **Reflections of Reality in Japanese Art** Sherman E. Lee, Michael R. Cunningham, James T. Ulak, Cleveland Museum of Art, Japan. rhythm Mondrian's simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian's theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader's encounter with the works of Mondrian Prof Kathleen Higgins

**Ukiyo-e Explained** David Bell, 2021-10-01 A great many volumes already exist on the subject of ukiyo-e mostly single focus works intended to appeal to connoisseurs or art historians Ukiyo-e Explained however is the first integrated study with wider scholarly appeal to show how ukiyo-e is art but also social history culture and craft Indeed ukiyo-e or floating world pictures form one of the most popular and widely known forms of Japanese art Their history has been well documented in the past and their distinctively decorative often sensual pictorial character is familiar to audiences around the world This study illuminates new pathways to a greater appreciation of ukiyo-e by addressing the environments and conditions under which the artists worked together with the factors that determined or conditioned the peculiar stylistic character of ukiyo-e It also examines the particular forces that governed this distinctive type of picture making and the corresponding development of popular tastes with the audiences of the day focusing especially on contemporary aesthetic sensibilities the ways artists learned their craft and the conditioning qualities of their medium

Critical Perspectives on Classicism in Japanese Painting Elizabeth Lillehoj, 2004-01-01 In the West classical art inextricably linked to concerns of a ruling or dominant class commonly refers to art with traditional themes and styles that resurrect a past golden era Although art of the early Edo period 1600-1868 encompasses a spectrum of themes and styles references to the past are so common that many Japanese art historians have variously described this period as a classical revival era of classicism or a renaissance How did seventeenth century artists and patrons imagine the past Why did they so often select styles and themes from the court culture of the Heian period 794-1185 Were references to the past something new or were artists and patrons in previous periods equally interested in manners that came to be seen as classical How did classical manners relate to other styles and themes found in Edo art In considering such questions the contributors to this volume hold that classicism has been an amorphous changing concept in Japan just as in the West Troublesome in its ambiguity and implications it cannot be separated from the political and ideological interests of those who have employed it over the years The modern writers who first

**The Tôkaidô Road** Jilly Traganou, 2004-08-02 The Tôkaidô Road offers a comparative study of the Tôkaidô road's representations during the Edo 1600-1868 and Meiji 1868-1912 eras Throughout the Edo era the Tôkaidô highway was the most important route of Japan and transportation was confined to foot travel In 1889 the

Tokaido Railway was established at first paralleling and eventually almost eliminating the use of the highway. During both periods the Tokaido was a popular topic of representation and was depicted in a variety of visual and literary media. After the installation of the railway in the Meiji era the Tokaido was presented as a landscape of progress, modernity and westernisation. Such representations were fundamental in shaping the Tokaido and the realm of travelling in the collective consciousness of the Japanese people. **On the Record Re Japan**, 1993 **The Figurative Works of Chen Hongshou (1599-1652)**

Tamara Heimarck Bentley, 2017-07-05. Despite the importance of Chen Hongshou 1599-1652 as an artist and scholar of the Ming period until now no full length study in English has focused on his work. Author Tamara H Bentley takes a broadly interdisciplinary approach treating Chen's oeuvre in relation to literary themes and economic changes and linking these larger concerns to visual analyses. Considering Chen's paintings and prints alongside Chen's romance drama commentaries and prefaces and his collected writings particularly poetry Bentley sheds new light not only on Chen but also on an important cultural moment in the first half of the seventeenth century. Through analysis of Chen's figure paintings and print designs Bentley examines the artist's engagement with the values of authenticity and emotion which were part of a larger discourse stressing idiosyncrasy, the individual voice and vernacular literature. She contrasts these values with the commercial aspects of his production geared at an expanding art market of well to do buyers excavating the apparent contradiction inherent in the two pursuits. In the end she suggests the emphasis on the authentic voice was marketed to a broad field of anonymous buyers. Though her primary focus is on Chen Hongshou Bentley's investigation ultimately concerns not only this individual artist but also the effect of early modern changes on an artist's mode of working and his self image in the West as well as the East. The study touches upon expanding international trade and the rise of middle class art markets including print markets not only in China but also in the Dutch Republic in circa 1630-1650. Bentley investigates the specific rhetoric of different categories of images including Chen's non literal figurative works, literal commemorative portraits, his printed romance drama illustrations and his printed playing cards. Bentley's investigation takes in issues of studio practice including various types of image replication. **The Figurative Works of Chen Hongshou (1599-1652)** Tamara Heimarck Bentley, Hongshou Chen, 2012.

Despite the importance of Chen Hongshou 1599-1652 as an artist and scholar of the late Ming period until now no full length study in English has focused on his work. Author Tamara H Bentley takes a broadly interdisciplinary approach treating Chen's oeuvre in relation to literary themes and economic changes and linking these larger concerns to visual analyses. In so doing Bentley sheds new light not only on Chen but also on an important cultural moment in the first half of the seventeenth century when Chinese scholar artists began to direct their work towards anonymous public markets.
