Critical Reflections on Cities in Southeast Asia Tim Bunnell, Lisa Barbara Welch Drummond, Ho Kong Chong, 2002 Critical Reflections draws together the multi disciplinary research of scholars working in on cities across Southeast Asia The fourteen essays collected in the volume are organised into three thematic sections re conceptualisation competition and intervention Collectively these reflections contribute to and interrogate the expanding urban and regional studies literature The volume constitutes a critical corrective to the existing literature which all too often seeks to diagnose contemporary urban trends everywhere from a small number of mostly Western paradigmatic cases Yet while acknowledging the increasing interconnectedness and shared global orientation of most cities in Southeast Asia the volume is wary of positing an equally generalising regional model Individually these essays attend to the diversity of contemporary urban experiences in Southeast Asia

The Other Mirror Miguel Angel Centeno, Fernando López-Alves, 2001 If social science s cultural turn has taught us anything it is that knowledge is constrained by the time and place in which it is produced In response scholars have begun to reassess social theory from the standpoints of groups and places outside of the European context upon which most grand theory is based Here a distinguished group of scholars reevaluates widely accepted theories of state property race and economics against Latin American experiences with a two fold purpose They seek to deepen our understanding of Latin America and the problems it faces And by testing social science paradigms against a broader variety of cases they pursue a better and truly generalizable map of the social world Bringing universal theory into dialogue with specific history the contributors consider what forms

Latin American variations of classical themes might take and which theories are most useful in describing Latin America For example the Argentinian experience reveals the limitations of neoclassical descriptions of economic development but Charles Tilly's emphasis on the importance of war and collective action to statemaking holds up well when thoughtfully adapted to Latin American situations Marxist structural analysis is problematic in a region where political divisions do not fully express class cleavages but aspects of Karl Polanyi's socioeconomic theory cross borders with relative ease This fresh theoretical discussion expands the scope of Latin American studies and social theory bringing the two into an unprecedented conversation that will benefit both Contributors are in addition to the editors Jeremy Adelman Jorge I Domínguez Paul Gootenberg Alan Knight Robert M Levine Claudio Lomnitz John Markoff Verónica Montecinos Steven C Topik and J Samuel Valenzuela *Handbook on Child Poverty and Inequality* Alberto Minujin, Enrique Delamonica, 2025-07-15 This Handbook provides a comprehensive overview of the conceptualisation and the latest developments in research about child poverty and inequality Adopting a child rights framework it demonstrates the importance of a multi dimensional understanding of poverty specific to children for both research and policy making [A Reflection on Sraffa's Revolution in Economic Theory](#) Ajit Sinha, 2021-06-02 This book presents a substantial collection of essays from a wide range of well respected scholars addressing several aspects of Piero Sraffa's economics in light of continuing controversies over the interpretation that should be placed on his work It moves beyond extant scholarship with an added emphasis on the philosophical dimension of Sraffa's seminal work *Production of Commodities by Means of Commodities* Contributors probe new ways of thinking about the political economy of Sraffa and in doing so alongside the comments to each contribution by other scholars provide a cutting edge debate and discussion on non mainstream economic theory This book will be of interest to academics and advanced graduate students in economics with additional interest from scholars in philosophy and the methodology of science
