*We Guarantee Academic Success!*, **An Unbroken Educational Apartheid Legacy** David E. Morgan Ph.D., 2015-03-17 This is a thought provoking book on the black white academic achievement gap in Chicago's predominantly black communities of color and what highly effective school boards can do to change it In this book the reader will be powerfully enlightened by a civil and human rights debate that calls for effective leadership in our schools beginning with effective school boards The primary agenda of effective school boards is raising student achievement performance levels and engaging the school district community to attain that goal These instructive analyses of effective school board leadership builds on the research and wisdom of great leaders Simultaneously it develops a breath of fresh air for school reformers who seek to implement a new model and escape the insanity and pathology inherent in school board dysfunctions and violations of our civil and human rights which prevents progress in Chicago's south suburban communities of color In both highs and lows of awesome moments as educational reform leaders and school board members we are in a strategic leadership position to help school boards carry out their essential responsibilities for creating equity and excellence in public education In doing so highly effective school leaders can team with our school board leaders to lead our school district communities in preparing

all students to succeed in a rapidly changing global society School board members doing the same things over and over again and then expecting different results in academic outcomes is the definition for insanity Education is freedom In an era of mass educational apartheid with its consequent mass incarceration of blacks that has surpassed the enforced chattel bondage of slavery s peak numbers in 1860 this book addresses a subject that is critically essential timely and in need of immediate attention for the security success and ultimate survival of black America As the problems of the academic under achievement gap is addressed in this book it is also essential that school boards educators and community and national leaders accept reality to view the problem in its true perspective to contemplate it as it is in providing essential solutions toward removing limiting and limited school boards dysfunctions obstructions and other barriers to academic achievement in effective school board leadership Supporting educational excellence will thereby produce more African American scholars in mathematics science and in many other disciplines This book will provide information and focus on some key action areas that successful school boards in America and around the world have focused their attention on Vision Standards Assessment Resource Alignment Climate Collaboration and Continuous Academic Improvement **School Effectiveness and School Improvement** Bert.P.M. **Reclaiming the Teaching Discourse in Higher Education** Ian M. Kinchin,2025-02-20 This book examines university teaching to encourage a move away from the singular lens of neoliberalism towards more a pluralistic stance that inspires a healthy diversity of theories and practices University teaching is dominated by neoliberal cultures of measurement consumerism and deficit generating a monocultural narrative that disenfranchises the higher education teaching community Collaborative communities of support are now perceived as performative regimes of surveillance and existing injustices in the education system have been amplified by institutional responses to the COVID 19 pandemic This book offers a reappraisal of the current state of university teaching and re imaginings of potential futures Inspired by emerging perspectives in educational research and building upon Biesta s notion of the rediscovery of teaching the book encourages an escape from

accepted wisdom liberating teaching from the bonds of reductive binary and linear thinking and accepting the need for a plurality of theoretical perspectives While universities use popular terms such as student centredness global excellence active learning and so on and will highlight key performance metrics such as student satisfaction or teaching excellence awards the reality is that much current teaching practice is rather traditional teacher centred passive and content heavy Despite managerial emphasis on best practice and evidence based practice teaching is not reducible to a simple set of competencies and student learning is not adequately summarised as a list of graduate attributes Teaching is relational and highly context dependent and our discussion of teaching should recognise this The performative culture pervading many campuses can dampen down large scale innovation leaving marginalised pockets of subversive collaboration and experimentation to operate below the corporate radar Here the contributors give voice to some of those emerging ideas and challenge neoliberal orthodoxy
