not only his detractors but also by many socialists and even a considerable number of Marxists as well Today we are experiencing the full impact and suffering the repercussions of capitalism s inherent need to become more than ever before a fully internationalized and integrated system of socio economic control and domination the global system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed The Cold War was over and we were promised a lasting peace But as we enter the third millennium we are facing escalating social divisions injustice and oppression with an environment in varying stages of ecological decay Daily we are bombarded by the schizoid media images of capitalism s extremes on television news the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world s slums and then the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation The author argues that critical education is needed to form a movement capable of challenging and then transforming capitalism She also offers an accessible account of Marx s dialectical critique and expos of capitalism clearly demonstrating the real enemy that should be the focus of anti capitalist and anti globalization struggles This is an account that explains why our main focus should not be on greedy individual capitalists or particular multinational corporations or even their handmaiden institutions such as the World Bank IMF WTO etc but instead the global network of capitalist social relations and consequent habituated human practices in which we are all involved These together with the historically specific form of capitalist wealth are the real enemy the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future     The Oxford Handbook of American Folklore and Folklife Studies Simon J. **The Discursive Construction of Identity and Space Among Mobile People** Roberta Piazza, 2020-12-10 This book offers a close look at the discourse of and around three socially marginalised and vulnerable groups: Irish Travellers, Squatters, and Homeless people, in order to understand more about how individuals within them position themselves vis-à-vis mainstream society. It investigates the groups' diverse and provisional relationship with space that challenges mainstream society's spatial logic. Given that the relationship between mobility, space, and identity has been explored in migrant contexts, Roberta Piazza proposes a reconsideration of this relationship beyond people's movement from one place to another. Investigating the space-identity nexus among the three groups, she highlights how mobility is not solely a cross-country phenomenon but a no less crucial and dramatic reality within an individual nation. Based on close linguistic analysis of interviews collected over many years, Piazza investigates how the participants construct their social and personal identities when talking about themselves and the sites they inhabit, drawing on the concepts of heterotopia and non-sexual desire.

Bordering the Baltic Madeleine Hurd, 2010 In this book, scholars from different disciplines use case studies drawn from Sweden, Norway, Finland, and Denmark to analyze the last century's construction of engagement with and challenges to both hard and soft Scandinavian boundaries. The book provides historical examples of how national borders have been contested by Scandinavian states caught between powerful Continental neighbors; these attempts

to firm up boundaries can be contrasted to the denationalization of borders caused both by the globalization of communications and markets and by political efforts to submerge national boundaries in a common Baltic identity. A second set of studies focuses on boundaries defining Scandinavian minorities. Here the book analyzes the spaces, rituals, bodies, gender roles, and collective identity discourses implicit in majority-minority boundaries and their transgression. Throughout Scandinavian bordering processes are studied in terms of the groups that launch them, the methods by which they are propagated, and finally the meanings supposedly and actually invested in them. Series: Nordische Geschichte, Vol. 10.
