every kind depends on mutual interaction between equine and human brains When we understand the function of both we can learn to communicate with horses on their terms instead of ours And by meeting horses halfway we not only save valuable training time and improve performance we achieve other goals too We develop much deeper bonds with our horses we handle them with insight and kindness instead of force or command we comprehend their misbehavior in ways that allow solutions and we reduce the human mistakes we often make while working with them In this illuminating book brain scientist and horsewoman Janet Jones describes human and equine brains working together Using plain language she explores the differences and similarities between equine and human ways of negotiating the world Mental abilities *Semiotic Evolution and the Dynamics of Culture* Marcel Bax,Barend van Heusden,Wolfgang Wildgen,2004 This book is about patterns of development in the history of culture Bringing together three areas of research semiotics cultural history and evolutionary psychology it attempts to bridge the gap that still separates the study of culture from the cognitive sciences The multidisciplinary approach chosen by the contributors derives its impetus from the deep conviction that in order to understand the logic of cultural development one must take the building blocks of culture that is signs and language as a starting point for research Central issues related to patterns of cultural evolution are dealt with in contributions on the development of mind and culture the history of the media the diversity of sign systems culture and code and the dynamics of semiosis Theoretically oriented contributions alternate with in depth case studies on such diverging topics as the evolution of language and art in prehistory ritual as the fountainhead of indirect communication developments in renaissance painting the evolution of classification systems in chemistry changing attitudes toward animal consciousness and developments in computer technology **Thought** , Spiral Dynamics Prof. Don Edward Beck,Christopher C.
