Ecohydraulics Ian Maddock,Atle Harby,Paul Kemp,Paul J. Wood,2013-07-01 *Ecohydraulics An Integrated Approach* provides a research level text which highlights recent developments of this emerging and expanding field With a focus on interdisciplinary research the text examines the evolution and scope of ecohydraulics interactions between hydraulics hydrology fluvial geomorphology and aquatic ecology the application of habitat modelling in ecohydraulic studies state of the art methodological developments and approaches detailed case studies including fish passage design and the management of environmental flow regimes research needs and the future of ecohydraulics research The contributions offer broad geographic coverage to encapsulate the wide range of approaches case studies and methods used to conduct ecohydraulics research The book considers a range of spatial and temporal scales of relevance and aquatic organisms ranging from algae and macrophytes to macroinvertebrates and fish River management and restoration are also considered in detail making this volume of direct relevance to those concerned with cutting edge research and its application for water resource management Aimed at academics and postgraduate researchers in departments of physical geography earth sciences environmental science environmental management civil engineering biology zoology botany and ecology *Ecohydraulics An Integrated Approach* will be of direct relevance to academics researchers and professionals working in environmental research organisations national agencies and consultancies Water Security in the Middle East Jean Axelrad Cahan,2017-01-02 *Water Security in the Middle East* argues that while conflicts over transboundary water systems in the Middle East do occur they tend not to be violent nor are they the primary cause of a war in this region The contributors in this collection of essays place water disputes in larger political historical and scientific contexts and discuss how the humanities and social sciences contribute towards this understanding The authors contend that international sharing of scientific and technological advances can significantly increase access to water and improve water quality While scientific advances can and should increase adaptability to changing environmental conditions especially climate change

national institutional reform and the strengthening of joint commissions are vital The contributors indicate ways in which cooperation can move from simple coordination to sophisticated adaptive and equitable modes of water management
