**River of Shadows** Rebecca Solnit, 2004-03-02 A New York Times Notable Book Winner of the National Book Critics Circle Award for Criticism The Mark Lynton History Prize and the Sally Hacker Prize for the History of Technology A panoramic vision of cultural change The New York Times Through the story of the pioneering photographer Eadweard Muybridge the author of *Orwell's Roses* explores what it was about California in the late 19th century that enabled it to become such a center of technological and cultural innovation The world as we know it today began in California in the late 1800s and Eadweard Muybridge had a lot to do with it This striking assertion is at the heart of Rebecca Solnit's new book which weaves together biography history and fascinating insights into art and technology to create a boldly original portrait of America on the threshold of modernity The story of Muybridge who in 1872 succeeded in capturing high speed motion photographically becomes a lens for a larger story about the acceleration and industrialization of everyday life Solnit shows how the peculiar freedoms and opportunities of post Civil War California led directly to the two industries Hollywood and Silicon Valley that have most powerfully defined contemporary society Eadweard Muybridge Stephen Herbert, 2004

Consuming Identities Amy DeFalco Lippert, 2018-03-02 Along with the rapid expansion of the market economy and industrial production methods such innovations as photography lithography and steam printing created a pictorial revolution in nineteenth century society The proliferation of visual prints ephemera spectacles and technologies transformed public values and perceptions and its legacy was as significant as the print revolution that preceded it *Consuming Identities* explores the significance of the pictorial revolution in one of its vanguard cities San Francisco the revolving door of the gold rush In their correspondence diaries portraits and reminiscences thousands of migrants to the city by the Bay demonstrated that visual media constituted a central means by which people navigated the bewildering host of changes taking hold around them in the second half of the nineteenth century from the spread of capitalism and class formation to immigration and urbanization Images themselves were inextricably associated with these world changing forces they were commodities but as representations of people they also possessed special cultural qualities that gave them new meaning and significance Visual media transcended traditional boundaries of language and culture that divided diverse groups within the same urban space From the 1848 conquest of California and the gold discovery to the disastrous earthquake and fire of 1906 San Francisco anticipated broader cultural transformations in the commodification implementation and popularity of images For the city's inhabitants and sojourners an array of imagery came to mediate intersect with and even constitute social interaction in a world where virtual reality was becoming normative **Aluminum Dreams** Mimi Sheller, 2014-02-14 How aluminum enabled a high speed gravity defying American modernity even as other parts of the world paid the price in environmental damage and political turmoil Aluminum shaped the twentieth century It enabled high speed travel and gravity defying flight It was the material of a streamlined aesthetic that came to represent modernity And it became an essential ingredient in

industrial and domestic products that ranged from airplanes and cars to designer chairs and artificial Christmas trees. It entered modern homes as packaging foil pots and pans and even infiltrated our bodies through food, medicine, and cosmetics. In *Aluminum Dreams*, Mimi Sheller describes how the materiality and meaning of aluminum transformed modern life and continues to shape the world today. Aluminum, Sheller tells us, changed mobility and mobilized modern life. It enabled air power, the space age, and moon landings. Yet as Sheller makes clear, aluminum was important not only in twentieth-century technology, innovation, architecture, and design but also in underpinning global military power, uneven development, and crucial environmental and health concerns. Sheller describes aluminum's shiny utopia but also its dark side. The unintended consequences of aluminum's widespread use include struggles for sovereignty and resource control in Africa, India, and the Caribbean; the unleashing of multinational corporations; and the pollution of the earth through mining and smelting, and the battle to save it. Using a single material as an entry point to understanding a global history of modernization and its implications for the future, *Aluminum Dreams* forces us to ask: How do we assemble the material culture of modernity, and what are its environmental consequences? *Aluminum Dreams* includes a generous selection of striking images of iconic aluminum designs, many in color, drawn from advertisements by Alcoa, Bohn, Kaiser, and other major corporations, pamphlets, films, and exhibitions.

**Hardship, Greed, and Sorrow** Devorah Romanek, 2019-09-05 In the aftermath of the Civil War, New Mexico Territory endured painful years of hardship and ongoing strife. During this turbulent period, a U.S. military officer stationed in the territory assembled an album of photographs, a series of still shots taken by one or more anonymous photographers. Now, some 150 years later, *Hardship, Greed, and Sorrow* reproduces the anonymous officer's souvenir album in its totality. Offering an important glimpse of the American Southwest in the mid-1860s, the book opens with a thoughtful foreword by Jennifer Nez Denetdale, who considers the varied and lingering effects that settlement, conquest, and nineteenth-century photography had on the Apaches and Navajos. In her insightful introduction accompanying the photographs, curator and scholar Devorah Romanek places the photographs in historical context and explains their unusual provenance. As she points out, the 1866 album integrates a number of important themes in connection to the Civil War and Reconstruction periods, including the French intervention in New Mexico and the internment of Navajos at the Bosque Redondo Indian Reservation. The story of the album's provenance reads like a mystery; some loose ends remain untied, and some questions remain unanswered. In addition to containing what may be the earliest extant photographs of Navajo Indians, the album features both studio and field images of U.S. Army officers, Mexican politicians, and various sites throughout New Mexico. According to Romanek, a number of the album's photographs have appeared in other publications but with scant attention to their original context or purpose. This compelling book reveals what we know about the collection, its compiler, and the photographer or photographers who captured such a fraught and complex moment in the history of the American Southwest.

**A Companion to the Literature and Culture of the American West** Nicolas S. Witschi, 2014-02-03 A Companion to

the Literature and Culture of the American West presents a series of essays that explore the historic and contemporary cultural expressions rooted in America's western states. Offers a comprehensive approach to the wide range of cultural expressions originating in the west. Focuses on the intersections, complexities and challenges found within and between the different historical and cultural groups that define the west's various distinctive regions. Addresses traditionally familiar icons and ideas about the west such as cowboys, wide open spaces and violence and their intersections with urbanization and other regional complexities. Features essays written by many of the leading scholars in western American cultural studies.

*Healing the Herds* Karen Brown, Daniel Gilfoyle, 2010-01-15 During the early 1990s the ability of dangerous diseases to pass between animals and humans was brought once more to the public consciousness. These concerns continue to raise questions about how livestock diseases have been managed over time and in different social, economic and political circumstances. *Healing the Herds: Disease, Livestock, Economies and the Globalization of Veterinary Medicine* brings together case studies from the Americas, western Europe and the European and Japanese colonies to illustrate how the rapid growth of the international trade in animals through the nineteenth century engendered the spread of infectious diseases, sometimes with devastating consequences for indigenous pastoral societies. At different times and across much of the globe, livestock epidemics have challenged social order and provoked state interventions, often opposed by farmers and herders. The intensification of agriculture has transformed environments with consequences for animal and human health. But the last two centuries have also witnessed major changes in the way societies have conceptualized diseases and sought to control them. From the late nineteenth century, advances in veterinary technologies afforded veterinary scientists a new professional status and allowed them to wield greater political influence. While older methods have remained important to strategies of control and prevention, as demonstrated during the outbreak of foot and mouth disease in Britain in 2001, the rise of germ theories and the discovery of vaccines against some infections made it possible to move beyond the blunt tools of animal culls and restrictive quarantines of the past. *Healing the Herds: Disease, Livestock, Economies and the Globalization of Veterinary Medicine* offers a new and exciting comparative approach to the complex interrelationships of microbes, markets and medicine in the global economy.

**The West in Early Cinema** Nanna Verhoeff, 2006-01-01 Verhoeff investigates the emergence of the western genre made in the first two decades of cinema, 1895-1915. By analyzing many unknown and forgotten films from international archives, she traces the relationships between films about the American West, their surrounding films and other popular media such as photography, painting, pulp literature, Wild West Shows and popular ethnography. Through this exploration of archival material, she raises new questions of historiography and provides a model for historical analysis. These first traces of the Western film reveal a preoccupation with presence and actuality that informs us about the way in which film as a new medium took shape within the context of its contemporary visual culture. In *The West in Early Cinema*, Nanna Verhoeff op zoek naar de nog onbekende beginjaren van het westerngenre tijdens de eerste

twee decennia van het medium film 1895 1915 Aan de hand van onbekende en vergeten films uit internationale filmarchieven traceert zij de relaties tussen films over het Westen omringende filmgenres uit deze periode en andere populaire media als fotografie schilderkunst pulp literatuur Wild West Shows en populaire etnografie Deze sporen van het genre tonen een grote actualiteit en variatie die laat zien op welke manier de film als nieuw medium een vorm vond binnen de toenmalige visuele cultuur

**An Introduction to Animals and Visual Culture** Randy Malamud, 2012-05-30 How and why do people frame animals so pervasively and what are the ramifications of this habit For animals being put into a cultural frame a film a website a pornographic tableau an advertisement a cave drawing a zoo means being taken out of their natural contexts leaving them somehow displaced and decontextualized Human vision of the animal equates to power over the animal We envision ourselves as monarchs of all we survey but our dismal record of polluting and destroying vast swaths of nature shows that we are indeed not masters of the ecosphere A more ethically accurate stance in our relationship to animals should thus challenge the omnipotence of our visual access to them
