How Modern Science Came Into the World H. F. Cohen, 2010 Once upon a time The Scientific Revolution of the 17th century was an innovative concept that inspired a stimulating narrative of how modern science came into the world Half a century later what we now know as the master narrative serves rather as a strait jacket so often events and contexts just fail to fit in No attempt has been made so far to replace the master narrative H Floris Cohen now comes up with precisely such a replacement Key to his path breaking analysis cum narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected revolutionary transformations each of some twenty five to thirty years duration This vision enables him to explain how modern science could come about in Europe rather than in Greece China or the Islamic world It also enables him to explain how half way into the 17th century a vast crisis of legitimacy could arise and in the end be overcome

Jewish Faith and Modern Science Norbert M. Samuelson, 2008-10-17 In *Jewish Faith and Modern Science*, renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died—that it has failed to address the challenges to traditional beliefs posed by scientific advances and is therefore no longer relevant to Jews today. Samuelson confronts these challenges head-on, critically reflecting on how all of the forms of contemporary Judaism, from orthodox to liberal to secular to new age, can address questions raised by the latest scientific advances. Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends, Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world.
