## **Road To The Abolition Of Nuclear Weapons:**

*The Road to the Abolition of Nuclear Weapons* Asahi Shinbunsha,1999      **The Challenge of Abolishing Nuclear Weapons** David Krieger,2017-07-05 In the more than sixty years since the advent of nuclear weapons there has been little meaningful progress toward nuclear disarmament Some countries have nuclear weapons while other states are forbidden to acquire them a status quo that lacks rational basis and cannot be sustained In this remarkable collection scholars and policy analysts argue that humankind has a choice either allow nuclear weapons to continue to proliferate throughout the world or move toward their complete elimination The vast majority of people on the planet would surely opt to abolish nuclear weapons But decisions about nuclear weapons are not made by the public but by small groups of political elites Consequently in a world with nuclear weapons the fate of humanity rests in the hands of a small number of individuals whose perceptions communications and judgment determine whether there is to be a future The contributors to this volume provide historical perspective on nuclear weapons policy explore the role of international law in furthering the prospects of nuclear weapons abolition consider the obstacles to abolition present a path to achieving a nuclear weapons free world and look beyond abolition to consider issues of post abolition sovereignty and general and complete disarmament The goal of a nuclear weapons free world can be awakened by an engaged citizenry bringing pressure from below in demanding action from political leaders This book contributes to this awakening and engagement      **The Road to the Abolition of Nuclear Weapons** Asahi Shimbun,1996      **Bulletin of the Atomic Scientists** ,1998-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      **The Road to the Abolition of Nuclear Weapons** ,1999      *Ronald Reagan and His Quest to Abolish Nuclear Weapons* Paul Lettow,2006-02-14 In *Ronald Reagan and His Quest to Abolish Nuclear Weapons* Paul Lettow explores the depth and sophistication of President Ronald Reagan s commitment to ridding humankind permanently of the threat of nuclear war Lettow s narrative spans the start of Reagan s presidency and the 1986 Reykjavik summit between Reagan and Soviet leader Mikhail Gorbachev during which America s Strategic Defense Initiative SDI was a defining issue Lettow reveals SDI for what it was a full on assault against nuclear weapons waged as much through policy as through ideology While cabinet members and advisers played significant roles in guiding American defense policy it was Reagan himself who presided over every element large and small of this paradigm shift in U S diplomacy Lettow conducted interviews with several former Reagan administration officials and he draws upon the vast body of declassified security documents from the Reagan presidency much of what he quotes from these documents appears publicly here for the first time The result is the first major work to apply such evidence to the study of SDI and superpower diplomacy This is a survey that doesn t merely add nuance to the existing record but revises our very understanding of the Reagan presidency      **Bulletin of the Atomic Scientists** ,1996-09 The Bulletin of the Atomic

Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      **Bulletin of the Atomic Scientists** ,1996-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      *Global Nuclear Disarmament* Nik Hynek,Michal Smetana,2015-12-22 This book examines the issue of nuclear disarmament in different strategic political and regional contexts This volume seeks to provide a rich theoretical and practical insight to one of the major topics in the field of international security global abolishment of nuclear weapons Renewed calls for a nuclear weapons free world have sparked a wide academic debate on both the attainability of such goal and the steps that should be taken Comparably less attention however has been paid to theoretically informed considerations of the consequences of nuclear abolition Comprising essays from leading scholars and experts within the field this collection discusses the fundamental theoretical and conceptual foundations of nuclear disarmament and subsequently tries to assess its hypothetical impact in global and regional contexts The varied methodological approach of the contributors aims to advance a multi theoretical and multi perspectival view of the issue The book is organized in three main sections Strategic Perspectives dealing with the specific constraints and facilitators for the states to achieve their core objectives Political Perspectives with the focus on the power of norms belief systems and ideas and Regional Perspectives with the analyses of seven regional and or state specific nuclear contexts As a whole the volume provides a detailed complex overview of the risks and opportunities that are embedded in the vision of a nuclear weapon free world This book will be of great interest to students of nuclear proliferation arms control war and conflict studies international relations and security studies      **Lawrence Livermore National and Sandia National Laboratories, Continued Operation** ,1992      **Bulletin of the Atomic Scientists** ,1996-11 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      *Final Environmental Impact Statement and Environmental Impact Report for Continued Operation of Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore: Attachments* ,1992      **Joint Force Quarterly** ,2009      **Bulletin of the Atomic Scientists** ,1996-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      *The Hope And Vision Of J. Robert Oppenheimer* Michael A Day,2015-09-15 Michael Day s insightful philosophical biography of J Robert Oppenheimer stands out from other works on the so called father of the atomic bomb by its focus on the post war period and by the depth of its philosophical engagement with his humanistic thought on science and culture Centaurus ReviewIncorporating elements from history science philosophy

and international relations theory this book takes a fresh look at the life and thought of Robert Oppenheimer The author argues that not only are Oppenheimer s ideas important engaging and relevant but also more coherent than generally assumed He makes a convincing case that Oppenheimer has much to say about 21st century issues and his voice should be brought back into the public forum The book recovers and reconstructs what Oppenheimer said and wrote during the 1940s 50s and 60s i e his hope and vision with the goal of identifying what might be of general philosophical interest today It considers not only Oppenheimer s thought but also his life using philosophical ideas developed by contemporary philosophers In addition to deepen and broaden the discussion and demonstrate the relevance of Oppenheimer s vision for the present the author analyzes his views using contemporary international relations theory with a special emphasis on nuclear nonproliferation and disarmament This examination reveals ways in which Oppenheimer s reasoning was prescient of current work being carried out to control and possibly move beyond the nuclear revolution

**Designing Denuclearization** Bruce Larkin,2018-02-06 This work canvasses nuclear weapon abolition proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today It has an ambitious purpose to show that nuclear abolition can and should be placed on the public agenda a The author terms it interpretive in that it incorporates his commentaries never hiding his reasons and judgments It is neither just the facts nor all the facts It is an encyclopedia in the original meaning of a general course of instruction He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose committed to self instruction In another sense he writes this work is a conversation with the Reader What is needed to abolish nuclear weapons His starting point is this As long as nuclear weapons are stockpiled and deployed there is risk of their use which would be catastrophic Abolition however is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo Even with that the politics of abolition bringing the governments of the nuclear weapon states to believe that abolition is in their interest is the sine qua non of achieving a world free of nuclear weapons Larkin s text is written for those whether practitioners or citizens interested in designing and bringing about denuclearization Abolition cannot be achieved by political elites in the absence of broad concurrent public support Governments career policy officials and legislators have chosen to assume responsibility for the public agenda They may be asked must be asked what they will do to bring about denuclearization

Civilization's Crisis: A Set Of Linked Challenges John Scales Avery,2017-04-20 Modern civilization faces a broad spectrum of daunting problems but rational solutions are available for them all This book explores the following issues 1 Threats to the environment and climate change 2 a growing population and vanishing resources 3 the global food and refugee crisis 4 intolerable economic inequality 5 the threat of nuclear war 6 the military industrial complex and 7 limits to growth These problems are closely interlinked and their possible solutions are discussed in this book

**The Myth of the Nuclear Revolution** Keir A. Lieber,Daryl G. Press,2020-06-15 Leading analysts have predicted for decades that nuclear weapons

would help pacify international politics The core notion is that countries protected by these fearsome weapons can stop competing so intensely with their adversaries they can end their arms races scale back their alliances and stop jockeying for strategic territory But rarely have theory and practice been so opposed Why do international relations in the nuclear age remain so competitive Indeed why are today s major geopolitical rivalries intensifying In *The Myth of the Nuclear Revolution* Keir A Lieber and Daryl G Press tackle the central puzzle of the nuclear age the persistence of intense geopolitical competition in the shadow of nuclear weapons They explain why the Cold War superpowers raced so feverishly against each other why the creation of mutual assured destruction does not ensure peace and why the rapid technological changes of the 21st century will weaken deterrence in critical hotspots around the world By explaining how the nuclear revolution falls short Lieber and Press discover answers to the most pressing questions about deterrence in the coming decades how much capability is required for a reliable nuclear deterrent how conventional conflicts may become nuclear wars and how great care is required now to prevent new technology from ushering in an age of nuclear instability
