War Gwynne Dyer, 2010-10-22 A revised edition of Dyer s classic book widely regarded as one of the most compelling analyses of the history of armed conflict War is part of our history but it is not in at all the same sense part of our prehistory It is one of the innovations that occurred between nine and eleven thousand years ago when the first civilized societies were coming into being What has been invented can be changed war is not in our genes With this provocative statement Gwynne Dyer launches his brilliant discussion of the history and nature of war He traces the growth of organized warfare through history showing conclusively that the basic tenet has remained unchanged war is an act of mass violence applied against an enemy so that he will do what you want him to do The only real change has been technological permitting us to make war on a mass scale At the height of the Cold War just such a global conflagration seemed almost inevitable But the collapse of the Iron Curtain and the ensuing political changes have forced a re examination of the accepted fundamentals of history Will open access to the channels of mass communication create enough shared values that we can move beyond mass warfare Is the threat of terrorism a red herring designed to preserve the military status quo Are our traditional military and administrative hierarchical structures still relevant Now more than ever in our post September 11 world we need Gwynne Dyer s expertise to understand the greatest and most human drama the act of war Excerpt from War The Siamese twins army and state have never been separated since they were born some eight or nine thousand years ago and most of the time the state is the stronger of the twins Armies exist to serve the interests of the state that owns them and their legitimacy comes solely from the fact that they belong to states similar groups of armed men if self employed are generally known as rebels or bandits This is the context in which warfare as opposed to casual and illegitimate violence must be seen it is something states
