Light and Liberty Robert M. S. McDonald, 2012 Although Thomas Jefferson's status as a champion of education is widely known the essays in *Light and Liberty* make clear that his efforts to enlighten fellow citizens reflected not only a love of learning but also a love of freedom Using as a starting point Jefferson's conviction that knowledge is the basis of republican self government the contributors examine his educational projects not as disparate attempts to advance knowledge for its own sake but instead as a result of his unyielding almost obsessive desire to bolster Americans republican virtues and values Whether by establishing schools or through broader extra institutional efforts to disseminate knowledge Jefferson's endeavors embraced his vision for a dynamic and meritocratic America He aimed not only to provide Americans with the ability to govern themselves and participate in the government of others but also to influence Americans to remake their society in accordance with his own principles Written in clear and accessible prose *Light and Liberty* reveals the startling diversity of Jefferson's attempts to rid citizens of the ignorance and vice that in the view of Jefferson and many contemporaries had corroded and corrupted once great civilizations Never wavering from his faith that knowledge is power Jefferson embraced an expansive understanding of education as the foundation for a republic of free and responsible individuals who understood their rights and stood ready to defend them

The Sociology of Military Science Chris Paparone, 2012-11-08 This groundbreaking work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm The author offers fresh sociological avenues to become more institutionally reflexive to offer a variety of design frames of reference beyond those typified by modern military doctrine Modernist military knowledge has been institutionalized to the point that blinds militaries to alternative designs organizationally and in their interventions This book seeks to reconstruct strategy and operations in designing ways and develops theories of action through multifaceted contextualizations and recontextualizations of situations showing that Military Design does not have to rely on set rational analytic decision making schemes but on seeking alternative meanings in and on action The work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished Written by Colonel Paparone U S Army Ret PhD with a special chapter by two active duty officers it will appeal to all in military and security studies including
