The Bear River Massacre and the Making of History Kass Fleisher,2004-02-01 At dawn on January 29 1863 Union affiliated troops under the command of Col Patrick Connor were brought by Mormon guides to the banks of the Bear River where with the tacit approval of Abraham Lincoln they attacked and slaughtered nearly three hundred Northwestern Shoshoni men women and children Evidence suggests that in the hours after the attack the troops raped the surviving women an act still denied by some historians and Shoshoni elders In exploring why a seminal act of genocide is still virtually unknown to the U S public Kass Fleisher chronicles the massacre itself and investigates the National Park Service s proposal to create a National Historic Site to commemorate the massacre but not the rape When she finds herself arguing with a Shoshoni woman elder about whether the rape actually occurred Fleisher is forced to confront her own role as a maker of this conflicted history and to examine the legacy of white women busybodies

Rough-Hewn Land Keith Heyer Meldahl,2013-05 Rough Hewn Land tells the geologic story of the American West the story of its rocks rivers mountains earthquakes and mineral wealth including gold It tells it by taking you on a 1000 mile long field trip across the rough side of the continent from the California coast to the Rocky Mountains This book puts you on the outcrop geologic hammer in hand to explore the evidence for how the spectacular rough hewn lands of the West came to be When North America broke free from Eurasia and Africa some 200 million years ago it triggered a cascade of violent geologic events that shaped the West we see today As the west moving continent crunched across the seabed of the ancient Pacific islands and assorted pieces of ocean floor collected against its prow to build California and plant gold there too Meanwhile mountains squeezed upward from California to Colorado and

vast quantities of molten rock seeded the crust with precious metals while spewing volcanic fire across the land Later the land stretched like an accordion to form the washboard like Basin and Range province and Great Basin within it while California began to crackle along the San Andreas fault Throughout the West today a near constant drumroll of earthquakes testifies to a world still reshaping itself in response to the ceaseless movements of the Earth s tectonic plates Rough Hewn Land weaves these stories into the human history of the West As we follow the adventures of John C Fr mont Mark Twain the Donner party and other historic characters we see how geologic forces have shaped human experience just as they direct the fate of the West today

Believing In Place Richard V. Francaviglia,2016-02-01 The austere landscape of the Great Basin has inspired diverse responses from the people who have moved through or settled in it Author Richard V Francaviglia is interested in the connection between environment and spirituality in the Great Basin for here he says faith and landscape conspire to resurrect old myths and create new ones As a geographer Francaviglia knows that place means more than physical space Human perceptions and interpretations are what give place its meaning In Believing in Place he examines the varying human perceptions of and relationships with the Great Basin landscape from the region s Native American groups to contemporary tourists and politicians to determine the spiritual issues that have shaped our connections with this place In doing so he considers the creation and flood myths of several cultures the impact of the Judeo Christian tradition and individualism Native American animism and shamanist traditions the Mormon landscape the spiritual dimensions of gambling the religious foundations of Cold War ideology stories of UFOs and alien presence and the convergence of science and spirituality Believing in Place is a profound and totally engaging reflection on the ways that human needs and spiritual traditions can shape our perceptions of the land That the Great Basin has inspired such a complex variety of responses is partly due to its enigmatic vastness and isolation partly to the remarkable range of peoples who have found themselves in the region Using not only the materials of traditional geography but folklore anthropology Native American and Euro American religion contemporary politics and New Age philosophies Francaviglia has produced a fascinating and timely investigation of the role of human conceptions of place in that space we call the Great Basin
