unrivaled works of furniture which were distinguished by unique designs and arcane details More than just decorative flourishes however the visual language employed by Huguenot artisans reflected a distinct belief system shaped during the religious wars of sixteenth century France In Fortress of the Soul historian Neil Kamil traces the Huguenots journey to New York from the Aunis Saintonge region of southwestern France There in the sixteenth century artisans had created a subterranean culture of clandestine workshops and meeting places inspired by the teachings of Bernard Palissy a potter alchemist and philosopher who rejected the communal militaristic ideology of the Huguenot majority which was centered in the walled city of La Rochelle Palissy and his followers instead embraced a more fluid portable and discrete religious identity that encouraged members to practice their beliefs in secret while living safely even prospering as artisans in hostile communities And when these artisans first fled France for England and Holland then left Europe for America they carried with them both their skills and their doctrine of artisanal security Drawing on significant archival research and fresh interpretations of Huguenot material culture Kamil offers an exhaustive and sophisticated study of the complex worldview of the Huguenot community From the function of sacred violence and alchemy in the visual language of Huguenot artisans to the impact among Protestants everywhere of the destruction of La Rochelle in 1628 to the ways in which New York s Huguenots interacted with each other and with other communities of religious dissenters and refugees Fortress of the Soul brilliantly places American colonial history and material life firmly within the larger context of the early modern Atlantic world

William Harvey's Biological Ideas Walter Pagel, 1967 By his discovery of the circulation of the blood Harvey laid the foundation of scientific biology and medicine And yet Harvey was the child of a pre rationalistic age He was the life long thinker on the purpose and indeed the mystery of circular phenomena the circulation of the blood on the one hand and the cycle of generation on the other both forming the microscopic copy of a cosmological pattern
