thinking about and living with the mysterious existence named creation Introduction to Medieval Theology Rik Van Nieuwenhove, 2022-03-24 This classic book now in a second expanded edition is an invitation to think along with major theologians and spiritual authors men and women from the time of St Augustine to the end of the fourteenth century who profoundly challenge our post modern assumptions Medieval theology was radically theocentric Trinitarian Scriptural and sacramental yet it also operated with a rich notion of human understanding In a post modern setting when modern views on autonomous reason are increasingly questioned it is fruitful to re engage with pre modern thinkers who did not share our modern and post modern presuppositions Their different perspective does not antiquate their thought on the contrary it makes them profoundly challenging and enriching for theology today This survey introduces readers to key theologians of the period and explores themes of the relationship between faith and reason the mystery of the Trinity soteriology Christian love and the transcendent thrust of medieval thought **The Scientific Achievement of the Middle Ages** Richard C.

Biblical Interpretation from the Church Fathers to the Reformation Karlfried Froehlich, 2024-10-28 The history of biblical interpretation has attracted considerable attention in recent decades This is particularly true in the field of medieval exegesis where much effort has been spent on making primary materials available and advancing their interpretation One area of research in which even the most basic questions are still under debate is the phenomenon of the biblical Glossa Ordinaria the standard Bible commentary used by Christian theologians from the twelfth century to the Reformation Part I of the present collection unites the author's major contributions to Glossa studies its origin its false ascription to Walafrid Strabo its use among the preachers of the thirteenth and fourteenth century and the Reformers both Catholic and Protestant of the sixteenth A central concern here is the fascinating history of the printed Gloss which began with the Strasbourg edition of 1480 81 Part II concentrates on the image of two central New Testament figures the Apostles Peter and Paul in biblical exegesis The studies illuminate the pivotal role in the history of the church played by certain shifts in the understanding of Petrine texts and trace conflicting tendencies in the interpretation of Paul down to the Reformation of the sixteenth century Three of the thirteen essays have not been published before Monastic Life in the Medieval British Isles

Julie Kerr, Emilia Jamrozak, Karen Stöber, 2018-10-15 This book celebrates the work and contribution of Professor Janet Burton to medieval monastic studies in Britain Burton has fundamentally changed approaches to the study of religious foundations in regional contexts Yorkshire and Wales placing importance on social networks for monastic structures and female Cistercian communities in medieval Britain moreover she has pioneered research on the canons and their place in medieval English and Welsh societies This Festschrift comprises contributions by her colleagues former students and friends leading scholars in the field who engage with and develop themes that are integral to Burton's work The rich and diverse collection in the present volume represents original work on religious life in the British Isles from the twelfth to the sixteenth

century as homage to the transformative contribution that Burton has made to medieval monastic studies in the British Isles

Since the Beginning Kyle R. Greenwood, 2018-09-04 Few passages in the Hebrew Bible have been subject to more scrutiny than Genesis 1 and 2 In this volume a diverse international team of experts guides readers through interpretations of the Genesis creation stories throughout history inviting them to consider perspectives from the earliest times to the present The book offers an accurate description of how these chapters have been read through the centuries explaining each interpretive approach in its own terms Each chapter includes sidebars and suggestions for further reading **Oxoniensia**

, 1945 **The Summa Halensis** Lydia Schumacher, 2020-05-05 For generations early Franciscan thought has been widely regarded as unoriginal a mere attempt to systematize the longstanding intellectual tradition of Augustine in the face of the rising popularity of Aristotle This volume brings together leading scholars in the field to undertake a major study of the sources and context of the so called Summa Halensis 1236-45 which was collaboratively authored by the founding members of the Franciscan school at Paris above all Alexander of Hales and John of La Rochelle in an effort to lay down the Franciscan intellectual tradition for the first time The contributions will highlight that this tradition far from unoriginal laid the groundwork for later Franciscan thought which is often regarded as formative for modern thought Furthermore the volume shows the role this Summa played in the development of the burgeoning field of systematic theology which has its origins in the young university of Paris This is a crucial and groundbreaking study for those with interests in the history of western thought and theology specifically **Medieval Ethnographies** Joan-Pau Rubies, 2017-05-15 From the twelfth century a

growing sense of cultural confidence in the Latin West at the same time that the central lands of Islam suffered from numerous waves of conquest and devastation was accompanied by the increasing importance of the genre of empirical ethnographies From a global perspective what is most distinctive of Europe is the genre's long term impact rather than its mere empirical potential or its ethnocentrism all of which can also be found in China and in Islamic cultures Hence what needs emphasizing is the multiplication of original writings over time their increased circulation and their authoritative status as a scientific discourse The empirical bent was more characteristic of travel accounts than of theological disputations in fact the less elaborate the theological discourse the stronger the ethnographic impulse although many travel writers were clerics This anthology of classic articles in the history of medieval ethnographies illustrates this theme with reference to the contexts and genres of travel writing the transformation of enduring myths ranging from oriental marvels to the virtuous ascetics of India or Prester John the practical expression of particular encounters from the Mongols to the Atlantic and the various attempts to explain cultural differences either through the concept of barbarism or through geography and climate

Simon Oliver begins with the background to the Christian theology of creation in Greek philosophy and the Old Testament. This provides a route into understanding the claim that we are part of a created order that is also the theatre of God's providential action. He examines different understandings of creation including creation out of nothing and the analogy of being with close reference to the work of patristic and medieval theologians such as Augustine and Thomas Aquinas. This leads to an historical overview of the relationship between theological, philosophical and scientific approaches to creation in the modern period. Some of the ethical issues concerning humanity's place within and treatment of creation and our environment are also examined. A distinctive yet traditional theology of creation is proposed focused on the concepts of gift and participation as ways of understanding more fully the meaning and implications of the claim that the universe is created.
