*Robert Smithson* Robert Smithson, 1996-04-10 Robert Smithson 1938 1973 one of the most important artists of his generation produced sculpture drawings photographs films and paintings in addition to the writings collected here

**Robert Smithson, the Collected Writings** Robert Smithson, 1996      **Robert Smithson: the Collected Writings (in Acq)** Jack (ed) Flam, 1996      **Gendering Landscape Art** Steven Adams, Anna Gruetzner Robins, 2000 While gender has been the subject of extensive critical inquiry the debate has focused primarily on the human particularly the female body The spaces bodies occupy and the ways in which those spaces are depicted in landscape art has not however been subject to investigation This book is the first sustained attempt to fill this gap in art history      **Earthworks** Suzaan Boettger, 2002 Her examination of Earthworks relationship to the ecology movement perceptively corrects a popular misconception about the artists goals while acknowledging the social and cultural complexities of the period      Walkscapes Francesco Careri, 2017-12-25 Walkscapes deals with strolling as an architecture of landscape Walking as an autonomous form of art a primary act in the symbolic transformation of the territory an aesthetic instrument of knowledge and a physical transformation of the negotiated space which is converted into an urban intervention From primitive nomadism to Dada and Surrealism from the Lettrist to the Situationist International and from Minimalism to Land Art this book narrates the perception of landscape through a history of the traversed city      **The New Monuments and the End of Man** Robert Slifkin, 2019-11-05 How leading American artists reflected on the fate of humanity in the nuclear era through monumental sculpture In the wake of the atomic bombings of Japan in 1945 artists in the United States began to question what it meant to create a work of art in a world where humanity could be rendered extinct by its own hand The New Monuments and the End of Man examines how some of the most important artists of postwar America revived the neglected tradition of the sculptural monument as a way to grapple with the cultural and existential anxieties surrounding the threat of nuclear annihilation Robert Slifkin looks at such iconic works as the industrially evocative welded steel sculptures of David Smith the austere structures of Donald Judd and the desolate yet picturesque earthworks of Robert Smithson Transforming how we understand this crucial moment in American art he traces the intersections of postwar sculptural practice with cybernetic theory science fiction cinema and literature and the political debates surrounding nuclear warfare Slifkin identifies previously unrecognized affinities of the sculpture of the 1940s and 1950s with the minimalism and land art of the 1960s and 1970s and acknowledges the important contributions of postwar artists who have been marginalized until now such as Raoul Hague Peter Grippe and Robert Mallery Strikingly illustrated throughout The New Monuments and the End of Man spans the decades from Hiroshima to the Fall of Saigon when the atomic bomb cast its shadow over American art      Anglo-American Exchange in Postwar Sculpture, 1945-1975 Rebecca Peabody, 2011-12-31 Anglo American Exchange in Postwar Sculpture 1945 1975 redresses an important art historical oversight Histories of American and British sculpture are usually told separately with artists and

their work divided by nationality yet such boundaries obscure a vibrant exchange of ideas individuals and aesthetic influences In reality the postwar art world saw dynamic interactions between British and American sculptors critics curators teachers and institutions Using works of art as points of departure this book explores the international movement of people objects and ideas demonstrating the importance of Anglo American exchange to the history of postwar sculpture *Systems We Have Loved* Eve Meltzer,2013-07-02 By the early 1960s theorists like L vi Strauss Lacan Foucault and Barthes had created a world ruled by signifying structures and pictured through the grids of language information and systems Artists soon followed turning to language and its related forms to devise a new conceptual approach to art making Examining the ways in which artists shared the structuralist devotion to systems of many sorts *Systems We Have Loved* shows that even as structuralism encouraged the advent of conceptual art it also raised intractable problems that artists were forced to confront Considering such notable art figures as Mary Kelly Robert Morris Robert Smithson and Rosalind Krauss Eve Meltzer argues that during this period the visual arts depicted and tested the far reaching claims about subjectivity espoused by theorists She offers a new way of framing two of the twentieth century s most transformative movements one artistic one expansively theoretical and she reveals their shared dream or nightmare of the world as a system of signs By endorsing this view Meltzer proposes these artists drew attention to the fictions and limitations of this dream even as they risked getting caught in the very systems they had adopted The first book to describe art s embrace of the world as an information system *Systems We Have Loved* breathes new life into the study of conceptual art **Waste Matters** Nikole Bouchard,2020-12-01 For thousands of years humans have experimented with various methods of waste disposal from burning and burying to simply packing up and moving in search of an unscathed environment Habits of disposal are deeply ingrained in our daily lives so casual and continual that we rarely ever stop to ponder the big picture effects on social spatial and ecological orders Rethinking the ways in which we produce collect discard and reuse our waste whether it s materials spaces or places is essential to ensure a more feasible future *Waste Matters Adaptive Reuse for Productive Landscapes* presents a series of historical and contemporary design ideas that reimagine a range of repurposed materials at diverse scales and in various contexts by exploring methods of hacking disassembly reassembly recycling adaptive reuse and preservation of the built environment *Waste Matters* will inspire designers to sample and rearrange bits of artifacts from the past and present to produce culturally relevant and ecologically sensitive materials objects architecture and environments *Fictioning* Burrows David Burrows,2019-03-14 Fictioning in art is an open ended experimental practice that involves performing diagramming or assembling to create or anticipate that which does not exist In this extensively illustrated book containing over 80 diagrams and images of artworks David Burrows and Simon O Sullivan explore the technics of fictioning through three focal points mythopoesis myth science and mythotechnesis These relate to three specific modes of fictioning performance fictioning science fictioning and machine fictioning In this way Burrows and O Sullivan explore how fictioning

can offer us alternatives to the dominant fictions that construct our reality in an age of post truth and perception management Through fictioning they look forward to the new kinds of human part human and non human bodies and societies to come

**Transfixed by Prehistory** Maria Stavrinaki,2022-05-24 An examination of how modern art was impacted by the concept of prehistory and the prehistoric Prehistory is an invention of the late nineteenth century In that moment of technological progress and acceleration of production and circulation three major Western narratives about time took shape One after another these new fields of inquiry delved into the obscure immensity of the past first to surmise the age of the Earth second to find the point of emergence of human beings and third to ponder the age of art Maria Stavrinaki considers the inseparability of these accounts of temporality from the disruptive forces of modernity She asks what a history of modernity and its art would look like if considered through these three interwoven inventions of the *longue durée* Transfixed by Prehistory attempts to articulate such a history which turns out to be more complex than an inevitable march of progress leading up to the Anthropocene Rather it is a history of stupor defamiliarization regressive acceleration and incessant invention since the new was also found in the deep sediments of the Earth Composed of as much speed as slowness as much change as deep time as much confidence as skepticism and doubt modernity is a complex phenomenon that needs to be rethought Stavrinaki focuses on this intrinsic tension through major artistic practices C zanne Matisse De Chirico Ernst Picasso Dubuffet Smithson Morris and contemporary artists such as Pierre Huyghe and Thomas Hirschhorn philosophical discourses Bataille Blumenberg and J nger and the human sciences This groundbreaking book will attract readers interested in the intersections of art history anthropology psychoanalysis mythology geology and archaeology

**The Art of Mechanical Reproduction** Tamara Trodd,2015-09-25 The Art of Mechanical Reproduction presents a striking new approach to how traditional art mediums painting sculpture and drawing changed in the twentieth century in response to photography film and other technologies Countering the modernist view that the medium provides advanced art with resistance against technological pressures Tamara Trodd argues that we should view art and its practices as imaginatively responding to the potential that artists glimpsed in mechanical reproduction putting art into dialogue with the commercial cultures of its time The Art of Mechanical Reproduction weaves a rich history of the experimental networks in which artists as diverse as Paul Klee Hans Bellmer Ellsworth Kelly Robert Smithson Gerhard Richter Chris Marker and Tacita Dean have worked and it shows for the first time how extensively technological innovations of the moment have affected their work Original and broad ranging The Art of Mechanical Reproduction challenges some of the most respected and entrenched criticism of the past several decades and allows us to think about these artists anew

*Perception and Agency in Shared Spaces of Contemporary Art* Cristina Albu,Dawna Schuld,2017-12-15 This book examines the interconnections between art phenomenology and cognitive studies Contributors question the binary oppositions generally drawn between visuality and agency sensing and thinking phenomenal art and politics phenomenology and structuralism and subjective involvement and

social belonging Instead they foreground the many ways that artists ask us to consider how we sense think and act in relation to a work of art

**The Art of Return** James Meyer,2019-09-11 More than any other decade the sixties capture our collective cultural imagination And while many Americans can immediately imagine the sound of Martin Luther King Jr declaring I have a dream or envision hippies placing flowers in gun barrels the revolutionary sixties resonates around the world China s communist government inaugurated a new cultural era African nations won independence from colonial rule and students across Europe took to the streets calling for an end to capitalism imperialism and the Vietnam War In this innovative work James Meyer turns to art criticism theory memoir and fiction to examine the fascination with the long sixties and contemporary expressions of these cultural memories across the globe Meyer draws on a diverse range of cultural objects that reimagine this revolutionary era stretching from the 1950s to the 1970s including reenactments of civil rights antiwar and feminist marches paintings sculptures photographs novels and films Many of these works were created by artists and writers born during the long Sixties who were driven to understand a monumental era that they missed These cases show us that the past becomes significant only in relation to our present and our remembered history never perfectly replicates time past This Meyer argues is precisely what makes our contemporary attachment to the past so important it provides us a critical opportunity to examine our own relationship to history memory and nostalgia

*American Artists Engage the Built Environment, 1960-1979* Susanneh Bieber,2023-07-31 This volume reframes the development of US American avant garde art of the long 1960s from minimal and pop art to land art conceptual art site specific practices and feminist art in the context of contemporary architectural discourses Susanneh Bieber analyzes the work of seven major artists Donald Judd Robert Grosvenor Claes Oldenburg Robert Smithson Lawrence Weiner Gordon Matta Clark and Mary Miss who were closely associated with the formal aesthetic innovations of the period While these individual artists came to represent diverse movements Bieber argues that all of them were attracted to the field of architecture the work of architects engineers preservationists landscape designers and urban planners because they believed these practices more directly shaped the social and material spaces of everyday life This book s contribution to the field of art history is thus twofold First it shows that the avant garde of the long 1960s did not simply develop according to an internal logic of art but also as part of broader sociocultural discourses about buildings and cities Second it exemplifies a methodological synthesis between social art history and poststructural formalism that is foundational to understanding the role of art in the construction of a more just and egalitarian society The book will be of interest to scholars working in art history architecture urbanism and environmental humanism

**Sculpture and Archaeology** Andrew Jones,2017-07-05 In recent years the intersections between art history and archaeology have become the focus of critical analysis by both disciplines Contemporary sculpture has played a key role in this dialogue The essays in this volume by art historians archaeologists and artists take the intersection between sculpture and archaeology as the prelude for analysis examining the metaphorical and conceptual role

of archaeology as subject matter for sculptors and the significance of sculpture as a three dimensional medium for exploring historical attitudes to archaeology      **Sculptural Materiality in the Age of Conceptualism** MarinR. Sullivan,2017-07-05

Sculptural Materiality in the Age of Conceptualism is structured around four distinct but interrelated projects initially realized in Italy between 1966 and 1972 Yayoi Kusama's Narcissus Garden Michelangelo Pistoletto's Newspaper Sphere Sfera di giornali Robert Smithson's Asphalt Rundown and Joseph Beuys's Arena These works all utilized non traditional materials collaborative patronage models and alternative modes of display to create a spatially and temporally dispersed arena of matter and action with photography serving as a connective material thread within the sculpture it reflects While created by major artists of the postwar period these particular projects have yet to receive substantive art historical analysis especially from a sculptural perspective Here they anchor a transnational narrative in which sculpture emerged as a node a center of transaction comprising multiple material phenomenon including objects images and actors When seen as entangled polymorphous entities these works suggest that the charge of sculpture in the late postwar period came from its concurrent existence as both three dimensional phenomena and photographic image in the interchanges among the materials that continue to activate and alter the constitution of sculpture within the contemporary sphere      *Materials, Practices, and Politics of Shine in Modern Art and Popular Culture* Antje Krause-Wahl,Petra Löffler,Änne Söll,2021-06-03

Shine allures and awakens desire As a phenomenon of perception shiny things and materials fascinate and tantalize They are a formative element of material culture promising luxury social distinction and the hope of limitless experience and excess Since the early twentieth century the mass production dissemination and popularization of synthetic materials that produce heretofore unknown effects of shine have increased At the same time shine is subjectified as glamor and made into a token of performative self empowerment The volume illuminates genealogical as well as systematic relationships between material phenomena of shine and cultural philosophical concepts of appearance illusion distraction and glare in bringing together renowned scholars from various disciplines      *Writing Our Extinction* Patrick Whitmarsh,2023-04-11

Mid twentieth century developments in science and technology produced new understandings and images of the planet that circulated the globe giving rise to a modern ecological consciousness but they also contributed to accelerating crises in the global environment including climate change pollution and waste In this new work Patrick Whitmarsh analyzes postwar narrative fictions that describe depict or express the earth from above the aerial and below the subterranean revealing the ways that literature has engaged this history of vertical science and linked it to increasing environmental precarity up to and including the extinction of humankind Whitmarsh examines works by writers such as Don DeLillo Karen Tei Yamashita Reza Negarestani and Colson Whitehead alongside postwar scientific programs including the Space Race atmospheric and underground nuclear testing and geological expeditions such as Project Mohole which attempted to drill to the earth's mantle As Whitmarsh argues by focusing readers attention on the fragility of postwar life through a vertical lens Anthropocene fiction highlights the

interconnections between human behavior and planetary change These fictions situate industrial history within the much longer narrative of geological time and reframe scientific progress as a story through which humankind writes itself out of existence
