Electric's columnist Model Aviation magazine RCAdvisor's Model Airplane Design Made Easy is the ultimate model airplane design book for both beginning and experienced modelers. Richard Kline, inventor of KFM airfoils, RCAdvisor's Model Airplane Design Made Easy is a real contribution to the world's literature on the subject. It provides an excellent bridge between full-scale aviation and aeromodeling, showing the relationship between the two for better understanding of the differences and similarities which should be applied for good model performance. While thorough in detail, the book is also easily readable so that the information is simple to understand. It is a very good combination of theory and practical application. Nicely illustrated, the book is also full of common sense explanations and references to other sources of information. John Worth, former President and Executive Director of the AMA, Carlos Reyes personally leads the reader through some basic aerodynamics, materials considerations, electric power system planning, and a practical application of theory as it is applied to a finished flying model. The background history of various types of aircraft shows the development of aviation and how it relates to the models that we build and fly today, as well as how models have influenced general aviation. It is always exciting to find some new to me concepts and theories, and there were several in this well-written narrative. Ken Myers, Editor of Ampeer electric flight newsletter, says: "No matter how long you've been aeromodelling or what your interests are in our great hobby, the greatest thrill of all is standing behind a unique model that you've designed and built yourself from a blank sheet of paper or even a blank CAD file and preparing to make that first take-off. So sit yourself down in a comfy chair, read RCAdvisor's Model Airplane Design Made Easy, and set off on aeromodelling's greatest adventure. Let Carlos Reyes, an aeromodeler of long standing and great talent, take you through the mysteries of how to arrive at the point that every lover of model aircraft should experience." Derek Woodward, aeromodeler, designer, and magazine writer for the past fifty years. Flying Magazine, 1932-12. Spinoff, 1997.
