Scaling Up Treatment For The Global Aids Pandemic:

Scaling Up Treatment for the Global AIDS Pandemic Institute of Medicine, Board on Global Health, Committee on Examining the Probable Consequences of Alternative Patterns of Widespread Antiretroviral Drug Use in Resource-Constrained Settings, 2004-11-24 An estimated forty million people carry the human immunodeficiency virus HIV and five million more become newly infected annually In recent years many HIV infected patients in wealthy nations have enjoyed significantly longer good quality lives as a result of antiretroviral therapy ART However most infected individuals live in the poorest regions of the world where ART is virtually nonexistent The consequent death toll in these regions especially sub Saharan Africa is begetting economic and social collapse To inform the multiple efforts underway to deploy antiretroviral drugs in resource poor settings the Institute of Medicine committee was asked to conduct an independent review and assessment of rapid scale up ART programs It was also asked to identify the components of effective implementation programs At the heart of the committee's report lie five imperatives Immediately introduce and scale up ART programs in resource poor settings Devise strategies to ensure high levels of patient adherence to complicated treatment regimens Rapidly address human resource shortages to avoid the failure of program implementation Continuously monitor and evaluate the programs to form the most effective guidelines and treatment regimens for each population Prepare to sustain ART for decades

Scaling Up Health Service Delivery Ruth Simmons, Peter Fajans, Laura Ghiron, 2007 The focus here is on ways to increase impact of health service innovations that have been tested in pilot or experimental projects so as to benefit more people and to foster policy and programme development on a lasting sustainable basis p i Preface
