these monuments Prisoners of History looks at World War II and the way it still tangibly exists within our midst He looks at all aspects of the war from the victors to the fallen from the heroes to the villains from the apocalypse to the rebuilding after devastation He focuses on twenty five monuments including The Motherland Calls in Russia the US Marine Corps Memorial in the USA Italy s Shrine to the Fallen China s Nanjin Massacre Memorial The A Bomb Dome in Hiroshima the balcony at Yad Vashem in Jerusalem and The Liberation Route that runs from London to Berlin Unsurprisingly he finds that different countries view the war differently In monuments erected in the US Lowe sees triumph and patriotic dedications to the heroes In Europe the monuments are melancholy ambiguous and more often than not dedicated to the victims In these differing international views of the war Lowe sees the stone and metal expressions of sentiments that imprison us today with their unchangeable opinions Published on the 75th anniversary of the end of the war Prisoners of History is a 21st century view of a 20th century war that still haunts us today *Georg Jensen* Alison Fisher,2018-01-01 This beautifully illustrated catalogue explores how Georg Jensen silver has expanded the boundaries of modern style changing the look of twentieth century homes and spreading Scandinavian design around the world Design for Everyday Living is the first scholarly treatment of Georg Jensen to approach the firm s output in an analytical way situating it in the context of twentieth century design history and focusing on the firm s unique evolution and global influence This book is geared to a wide audience of interested nonspecialists and design historians rather than to a narrower readership of silver collectors It is also innovative in that it focuses on the story of the firm rather than solely on the career of its founder The essays are all original and include a contribution from Thomas Thulstrup the leading expert on Georg Jensen silver The book also benefits from a close collaboration with the Jensen firm which has allowed us access to images and archival materials published here for the first time *The Gesamtkunstwerk in Design and Architecture* Anders V. Munch,2021-04-16 The history of modern design and architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture These attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art mostly associated with but certainly not limited to Richard Wagner s theoretical writings and musical dramas This utopian dream of the Gesamtkunstwerk or Total Work of Art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories cities and even modern media As a result the experiments ranged from music poetry and drama to architecture design visual communication and city planning These ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today but their complex and often problematic roots are mostly ignored Design and architecture have delivered some of the broadest and most influential experiments with the Gesamtkunstwerk from garden cities for workers and corporate identity design to the German AEG corporation *Design Culture* Guy Julier,Mads Nygaard Folkmann,Niels Peter Skou,Hans-Christian

Jensen, Anders V. Munch, 2019-02-21 Design culture foregrounds the relationships between the domains of design practice design production and everyday life Unlike design history and design studies it is primarily concerned with contemporary design objects and the networks between the multiple actors engaged in their shaping functioning and reproduction It acknowledges the rise of design as both a key component and a key challenge of the modern world Featuring an impressive range of international case studies Design Culture interrogates what this emergent discipline is its methodologies its scope and its relationships with other fields of study The volume's interdisciplinary approach brings fresh thinking to this fast evolving field of study

The Spirit of Vitalism Gertrud Hvidberg-Hansen, Gertrud Oelsner, 2011 This richly illustrated book outlines the strong Vitalistic movement in Denmark during the period 1890 1940 This movement emerged as a response to the rationalism and one sided intellectualism of a rigid bourgeois or decadent culture of the 19th century It constituted a number of cultural currents that were manifested in

philosophy art and everyday life with an emphasis on the energy of youth the dynamic personality and the potential of the body Viewed in the wider perspective the aim of Vitalism's cult of the body was a revitalization that was to benefit not only the individual human being but the whole of culture Although the Vitalistic themes emanated from modern life they also drew artistic sustenance from Nordic mythology and Greek antiquity which served as the most important ideals in the modern pursuit of both physical and spiritual beauty Additionally the book highlights the prevalence of the interest in health and exercise and an increased attentiveness to hygiene

Design & Applied Arts Index, 2001 *Our Own Devices* Edward Tenner, 2009-08-26 This delightful and instructive history of invention shows why National Public Radio dubbed Tenner the philosopher of everyday technology Looking at how our inventions have impacted our world in ways we never intended or imagined he shows that the things we create have a tendency to bounce back and change us The reclining chair originally designed for brief healthful relaxation has become the very symbol of obesity The helmet invented for military purposes has made possible new sports like mountain biking and rollerblading The typewriter created to make business run more smoothly has resulted in wide spread vision problems which in turn have made people more reliant on another invention eyeglasses As he sheds light on the many ways inventions surprise and renew us Tenner considers where technology will take us in the future and what we can expect from the devices that we no longer seem able to live without

Designing Worlds Kjetil Fallan, Grace Lees-Maffei, 2016-06-01 From consumer products to architecture to advertising to digital technology design is an undeniably global phenomenon Yet despite their professed transnational perspective historical studies of design have all too often succumbed to a bias toward Western industrialized nations This diverse but rigorously curated collection recalibrates our understanding of design history reassessing regional and national cultures while situating them within an international context Here contributors from five continents offer nuanced studies that range from South Africa to the Czech Republic all the while sensitive to the complexities of local variation and the role of nation states in identity construction

Scandinavian Design Kjetil Fallan, 2013-05-09 Scandinavian design is still seen as democratic functional and simple its products exemplifying the same characteristics now as they have done since the 1950s But both the essence and the history of Scandinavian design are much more complex than this Scandinavian Design Alternative Histories presents a radically new assessment a corrective to the persistent mythologies and reductive accounts of Scandinavian design The book brings together case studies from the early twentieth century to today Drawn from fields as diverse as transport engineering packaging photography law interiors and corporate identity these studies tell new or unfamiliar stories about the production mediation and consumption of design An alternative history is created one much more alive to national and regional differences and to types of product Scandinavian Design analyses a century of design culture from Denmark Finland Norway and Sweden and in so doing presents a sophisticated introduction to Scandinavian design

Artbibliographies Modern, 2005 Designing Disability Elizabeth Guffey, 2017-12-28 Designing Disability traces the emergence of an idea and an ideal

physical access for the disabled through the evolution of the iconic International Symbol of Access ISA The book draws on design history material culture and recent critical disability studies to examine not only the development of a design icon but also the cultural history surrounding it Infirmary and illness may be seen as part of human experience but disability is a social construct a way of thinking about and responding to a natural human condition Elizabeth Guffey's highly original and wide ranging study considers the period both before and after the introduction of the ISA tracing the design history of the wheelchair a product which revolutionised the mobility needs of many disabled people from the 1930s onwards She also examines the rise of barrier free architecture in the reception of the ISA and explores how the symbol became widely adopted and even a mark of identity for some especially within the Disability Rights Movement Yet despite the social progress which is inextricably linked to the ISA a growing debate has unfurled around the symbol and its meanings The most vigorous critiques today have involved guerrilla art graffiti and studio practice reflecting new challenges to the relationship between design and disability in the twenty first century *Twentieth Century Design* Jonathan M. Woodham, 1997-04-10 A look at the wider issues of design and industrial culture throughout Europe Scandinavia North America and the Far East The book explores the way in which 20th century designs such as the Coca Cola bottle have affected our culture more than those considered true classics **Designing Modern Norway** Kjetil Fallan, 2016-09-19 Designing Modern Norway A History of Design Discourse is an intellectual history of design and its role in configuring the modern Norwegian nation state Rather than a conventional national design history survey that focuses on designers and objects this is an in depth study of the ideologies organizations strategies and politics that combined might be said to have designed the modern nation's material and visual culture The book analyses main tropes and threads in the design discourse generated around key institutions such as museums organisations and magazines Beginning with how British and continental design reform ideas were mediated in Norway and merged with a nationalist sentiment in the late nineteenth century Designing Modern Norway traces the tireless and wide ranging work undertaken by enthusiastic and highly committed design professionals throughout the twentieth century to simultaneously modernise the nation by design and to nationalise modern design Bringing the discussion up towards the present the book concludes with an examination of how Norway's new found wealth has profoundly changed the production mediation and consumption of design *Light: The Shape of Space* Lou Michel, 1995-10-27 Light The Shape of Space Designing with Space and Light Lou Michel Every design professional who touches a space shapes the light and the feeling of that space Architect lighting engineer interior designer lighting or home furnishing manufacturer each contributes an aesthetic layer sometimes yielding unexpected results All too often the best laid plans of one professional are unintentionally subverted by another Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created Light The Shape of Space showing how to design with the effects of light rather than light itself The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials Drawing on over

fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as Light The Shape of Space
