*Scandinavian Studies* Carl Frank Bayerschmidt, Erik J. Friis, 1965      *New Studies in the Manuscript Tradition of Njáls saga* Svanhildur Óskarsdóttir, Emily Lethbridge, 2018-10-22 Njáls saga is the best known and most highly regarded of all medieval Icelandic sagas and it occupies a special place in Icelandic cultural history. The manuscript tradition is exceptionally rich and extensive. The oldest extant manuscripts date to only a couple of decades after the saga's composition in the late 13th century and the saga was subsequently copied by hand continuously up until the 20th century even alongside the circulation of printed text editions in latter centuries. The manuscript corpus as a whole has great socio-historical value showcasing the myriad ways in which generations of Icelanders interpreted the saga and took an active part in its transmission. The manuscripts are also valuable sources for evidence of linguistic change and other phenomena. The essays in this volume present new research and a range of interdisciplinary perspectives on the Njáls saga manuscripts. Many of the authors took part in the international research project The Variance of Njáls saga which was funded by the Icelandic Research Council from 2011-2013.      *Scandinavian Studies*, 1977 Includes Proceedings of the Society      Studies for Einar Haugen Evelyn S. Firchow, 2020-01-20 No detailed description available for Studies for Einar Haugen      **The Vikings and the Victorians** Andrew Wawn, 2000 Andrew Wawn draws together a wide range of source material including novels, poems, lectures and periodicals to give a comprehensive account of the construction and translation of the Viking age in 19th century Britain.      *An International Annotated Bibliography of Strindberg Studies 1870-2005: The plays* Michael Robinson, 2008 This copiously annotated bibliography documents and examines the whole range of commentary on Strindberg's works and activity in many fields besides the plays for which he is internationally best known. These include his prose fiction and poetry, his work as an historian and natural historian and his relationship to the other arts, most notably his painting. It is concerned with both lasting works of literary and dramatic criticism as well as reviews of his books and plays in the theatre and some more ephemeral material, all of this in several languages. Organised generically and by subject and individual work, the bibliography enables the reader to trace the changing impact of Strindberg and his works in various countries and during different periods. It is thus very much a study in reception as well as a bibliographical record of published material. It traces the developing image of Strindberg and his writing both during his lifetime and in subsequent years and with frequent cross-reference offers a comprehensive overview of a literary and existential project that has rarely

been matched for its multifaceted diversity The bibliography is published in three parts Volume 1 General Studies 978 0 947623 81 4 and Volume 3 Prose Poetry Miscellaneous 978 0 947623 83 8 are also now available Michael Robinson is Emeritus Professor of Drama and Scandinavian Studies at the University of East Anglia Norwich **Old Norse-Icelandic Studies** Hans Bekker-Nielsen, 1967-12-15 An annotated bibliography of Old Norse Icelandic studies for the years 1981 83 offering a quick guide to recent work Expectations of Life H.O. Lancaster, 2012-12-06 Destined to become a classic epidemiological study EXPECTATIONS OF LIFE surveys world mortality describing and explaining the declines of mortality which have become especially evident in this century **Witchcraft and Magic in Europe, Volume 3** Karen Jolly, Catharina Raudvere, Edward Peters, 2002-01-01 Between the age of St Augustine and the sixteenth century reformations magic continued to be both a matter of popular practice and of learned inquiry This volume deals with its use in such contexts as healing and divination and as an aspect of the knowledge of nature's occult virtues and secrets *Strategies, Dispositions and Resources of Social Resilience* Martin Endress, Lukas Clemens, Benjamin Rampp, 2020-04-24 The concept of resilience which originally emerged in psychology has spread to numerous disciplines and was further developed particularly in social ecology Resilience experiences an ongoing growing reception in the humanities and historical and social sciences as well including heterogenic approaches on how to conceptually frame resilience Common to these approaches is that resilience becomes topical in the context of analysing phenomena and processes of the resistibility of certain socio historical units or actors which are perceived as being faced with various constellations of disruptive change In this context resilience is not only taken to mean the opposite of vulnerability but at the same time resilience and vulnerability are understood as complementary concepts From this perspective vulnerability is a necessary condition of resilience and vice versa Against this background the present volume provides a preliminary appraisal of socio scientific and historical resilience research by assembling contributions of authors originating from different disciplines Thus it fosters an interdisciplinary discussion on the theoretical and analytical potentials as well as the empirical applicability of the concept of resilience Contents Strategies Dispositions and Resources Theoretical contributions Medieval case studies Reflections and General Comments The Editors Dr Martin Endre is Professor for General Sociology at the University of Trier Dr Lukas Clemens is Professor for Medieval History at the University of Trier Dr Benjamin Rampp is research assistant for General Sociology at the University of Trier **The Old Country and the New** Hildor Arnold Barton, 2007 In this collection are seventeen essays and seven editorials by Barton and published in leading journals between 1974 and 2005 The subjects include post World War II Swedish immigration and remigration to Sweden A full bibliography of Barton's publications on Swedish American history and culture is included Provided by publisher *Erikson, Eskimos & Columbus* James Robert Enterline, 2003-05-01 This revealing analysis of Medieval cartography and native American travel upends conventional narratives about discovering the New World For generations American schools have taught children that Christopher Columbus discovered America in 1492

But evidence shows that Leif Erikson set foot on the continent centuries earlier As debate continues over which explorer deserves the credit early maps of North America suggest that we may be asking the wrong questions How did medieval Europeans have such specific geographic knowledge of North America a land even their most daring adventurers had not yet discovered In Erikson Eskimos and Columbus James Robert Enterline presents new evidence that traces this knowledge to the cartographic skills of indigenous people of the high Arctic who he contends provided the basis for medieval maps of large parts of North America Drawing on an exhaustive chronological survey of pre Columbian maps including the controversial Yale Vinland Map this book boldly challenges conventional accounts of Europe s discovery of the New World *Arthurian Literature VI* Richard Barber,1986 Published by Boydell Brewer Inc *Scandinavian Studies in America* Gene G. Gage,1972
