**Special Educational Needs Book 5: Sound by Sound Part 3** Ann Sullivan, 2018-11-09 Phonics for Pupils with Special Educational Needs is a complete structured multisensory programme for teaching reading and spelling making it fun and accessible for all. This fantastic seven part resource offers a refreshingly simple approach to the teaching of phonics alongside activities to develop auditory and visual perceptual skills. Specifically designed to meet the needs of pupils of any age with special educational needs, the books break down phonics into manageable core elements and provide a huge wealth of resources to support teachers in teaching reading and spelling. Book 5 Sound by Sound Part 3 focuses on exploring complex sounds and their relationship with letters and letter combinations. Each chapter explores a key sound: oy, oo, u, i, e, aw, air, ar, and contains over 40 engaging activities including reading race, bits missing, spot the spelling word detective, and writing challenge. Thorough guidance is provided on how to deliver each activity, as well as a lesson planner template, a handy list of high frequency words, and posters for teachers and teaching assistants to use to support learning. Each book in the series gradually builds on children's understanding of sounds and letters and provides scaffolded support for children to learn about every sound in the English language. Offering tried and tested material which can be photocopied for each use, this is an invaluable resource to simplify phonics teaching for teachers and teaching assistants and provide fun new ways of learning phonics for all children. This book is accompanied by a companion resource Phonics for Pupils with Complex SEND to be used alongside the Phonics for Pupils with Special Educational Needs programme. The activities from Books 1-6 of the programme are adapted to be accessible for non-verbal pupils, including AAC users and those with physical disabilities.

**Haunted Halls** Elizabeth Tucker, 2009-10-20 Why do so many American college students tell stories about encounters with ghosts? In *Haunted Halls*, the first book-length interpretive study of college ghostlore, Elizabeth Tucker takes the reader back to school to get acquainted with a wide range of college spirits. Some of the best-known ghosts that she discusses are Emory University's Dooley, who can disband classes by shooting professors with his water pistol; Mansfield University's Sara, who threw herself down a flight of stairs after being rejected by her boyfriend; and Huntingdon College's Red Lady, who slit her wrists while dressed in a red robe. Gettysburg College students have collided with ghosts of soldiers, while students at St. Mary of the Woods College have reported frightening glimpses of the Faceless Nun. Tucker presents campus ghostlore from the mid-1960s to 2006, with special attention to stories told by twenty-first-century students through e-mail and instant messages. Her approach combines social psychological and cultural analysis with close attention to students' own explanations of the significance of spectral phenomena. As metaphors of disorder, insanity, and school spirit, college ghosts convey multiple meanings. Their colorful stories warn students about the dangers of overindulgence, as well as the pitfalls of potentially horrifying relationships. Besides offering insight into students' initiation into campus life, college ghost stories make important statements about injustices suffered by Native Americans, African Americans, and others.
