Painting Elizabeth Johns, 1991-01-01 American genre painting flourished in the thirty years before the Civil War a period of rapid social change that followed the election of President Andrew Jackson It has long been assumed that these paintings of farmers western boatmen and trappers blacks both slave and free middle class women urban urchins and other everyday folk served as records of an innocent age reflecting a Jacksonian optimism and faith in the common man In this enlightening book Elizabeth Johns presents a different interpretation arguing that genre paintings had a social function that related in a more significant and less idealistic way to the political and cultural life of the time Analyzing works by William Sidney Mount George Caleb Bingham David Gilmore Blythe Lilly Martin Spencer and others Johns reveals the humor and cynicism in the paintings and places them in the context of stories about the American character that appeared in sources ranging from almanacs and newspapers to joke books and political caricature She compares the productions of American painters with those of earlier Dutch English and French genre artists showing the distinctive interests of American viewers Arguing that art is socially constructed to meet the interests of its patrons and viewers she demonstrates that the audience for American genre paintings consisted of New Yorkers with a highly developed ambition for political and social leadership who enjoyed setting up citizens of the new democracy as targets of satire or condescension to satisfy their need for superiority It was this network of social hierarchies and prejudices and not a blissful celebration of American democracy that informed the look and the richly ambiguous content of genre painting Handbook of Dutch Church History

Herman J. Selderhuis, 2014-12-10 Herman Selderhuis as editor of this volume has brought together a team of experts resulting in a unique approach since each chapter is co written by a catholic and a protestant author who have all integrated the latest research results Each section begins with a brief historiographical overview The same time ecclesiastical events are always set within a greater framework of political social and cultural developments for which reason each author has taken the liberty to describe its own method The user will find in this book tables diagrams and illustrations Also many source texts are integrated in the narration Theses texts are intended to bring the described events and people closer to the reader and as it were to let them speak the words

The name of the book as Handbook of the church history of the Netherlands immediately brings to mind three problematic complexes which are relevant to its user First there is the nature of a handbook that is intended to be a good tool but also has its limitations it stimulates and necessitates the use of further books Second the area The Netherlands is a plurality and that is also noticeable in its church history for each region town and village has its own church history Third the history of the church for sure is the most important aspect but this history can only be understood if it is described in the context of political and social developments

Imagining Childhood Erika Langmuir, 2006-01-01 The images of children that abound in Western art do not simply mirror reality they are imaginative constructs representing childhood as a special stage of human life or emblematic of the human condition itself In a compelling book ranging widely across time national boundaries and genres from ancient Egyptian amulets to Picasso's Guernica Erika Langmuir demonstrates that no historic period has a monopoly on the discovery of childhood Famous pictures by great artists as well as barely known anonymous artefacts illustrate not only Western society's perennially ambivalent attitudes to children but also the many and varied functions that works of art have played throughout its history
