**Schepen van de Koninklijke Marine in de tweede wereldoorlog** L. L. von Münching, 1978     [U-Boat Attack Logs](#)

Bruce Taylor, Daniel Morgan, 2011-11-09 An indispensable reference work for anyone studying either the U boat campaign or WW2 at sea copiously illustrated fascinating and harrowing Navy News During the Second World War over 250 Allied warships from a dozen navies were sent to the bottom by German U boats This ground breaking study provides a detailed analysis of every sinking for which source material survives from both the Allied and the German sides resulting in detailed treatment of the fate of 110 vessels with the remainder summarized in an extensive appendix Uniquely each entry is built around a specialist translation of the relevant segment of the war diary log of the U boat in question taken directly from the surviving originals remarkably this represents the first large scale publication of the U boat war diaries in any language The book offers a wealth of new information not only with respect to the circumstances of the sinkings from both the Allied and German perspectives but also to the technical environment in which they lived as well as the fate of the crews The entries include background details on the vessels concerned and the men involved with a selection of rare and carefully chosen photos from archives and collections around the world Each entry is itself a compelling narrative but is backed with a list of sources consulted including documents published works and websites A decade in the making this is probably the most important book on the U boat war to be published for many a year Offers significant new information on many of the most famous incidents Maritime Advisor     *De Koninklijke Marine in de Tweede Wereldoorlog* Ph.
