The most profound and enduring social theorist of sociology's classical period Max Weber speaks as cogently to concerns of the new century as he did to those of the past In Max Weber and the New Century Alan Sica demonstrated Weber's preeminent position and lasting vitality within social theory by applying his ideas to a broad range of topics of contemporary concern Max Weber A Comprehensive Bibliography is a companion volume that offers some 4 600 bibliographic listings of work on Weber making it the most complete guide to the literature in English and a testament to the continued vitality of Weber's thought Sica's work supersedes all previous bibliographical efforts covering the Weber literature both in the quantity and accuracy of its references and the clarity and convenience of its format In order to demonstrate the enormous variety of Weberiana in English Sica has adopted a liberal criterion for inclusion rather than a critical one choosing to mix the best with what may be more routine work Following a preface in which previous bibliographies and bibliographic problems are discussed the volume opens with a series of five specialized bibliographies The first lists Weber's works in English translation The second lists reviews of Weber's major works including those translated into English while the third covers reviews of recent books and other work on Weber The fourth section contains a selection of dissertations and theses relating to Weber or his ideas The fifth includes primary and secondary sources treating Weber on rationality and rationalization processes The last and largest section offers a comprehensive Weber bibliography of works in English This large scale endeavor attempts to identify with accuracy and completeness the entire universe of Weber scholarship in English It will be an essential scholarly tool for sociologists historians economists and students of cultural and intellectual history

**Max Weber's Complete Writings on Academic and Political Vocations** Max Weber, 2008 Annotation This is the first edition in any language of all of Max Weber's writings on academic and political vocations The translation is new and liberally annotated including a look at Weber's personality and what it was that made him such a phenomenon Max Weber made many significant interpretations of both academic and political vocations in his two lectures on Science as a Vocation *Wissenschaft als Beruf* 1917 and Politics as a Vocation *Politik als Beruf* 1919 as well as in a series of newspaper articles including those written between 1908 and 1920 Since these writings are of more than historical interest there was a need to bring them all together in a single volume Newly translated and annotated this collection comprises both lectures plus 32 articles which Weber wrote on academia Most of these have not been translated before In the Introduction Prof John Dreijmanis relates the academic and political vocations to each other conceptually showing that there is considerable overlap and some convergence the need for passion an inward calling as well as career insecurity both vocations Dreijmanis then examines the person of Weber and provides a new view of him in part through the lens of Carl C Jung's theory of

psychological types as further developed by the Myers Briggs Type Indicator MBTI As an extravert with a powerful thinking function and intellect he was driven to take an interest in events outside himself and to speak his mind Coming after a long line of introverted German philosophers he was a phenomenon The new translations by Gordon C Wells are more faithful to Weber's style of expression and they correct an accumulation of errors of previous translations in the oft translated essays on Politics and Science Contains Glossary Bibliography Names Index Subject Index

**Max Weber and Postmodern Theory** N. Gane, 2002-04-09 This book explores the contemporary nature of Max Weber's work by looking in detail at his key concepts of rationalization and disenchantment Thematic parallels are drawn between Weber's rationalization thesis and the critiques of contemporary culture developed by Jean Francois Lyotard Michel Foucault and Jean Baudrillard It is suggested that these three postmodern thinkers develop and respond to Weber's analysis of modernity by pursuing radical strategies of affirmation and re-enchantment Examining the work of these three key thinkers in this way casts new light both on postmodern theory and on Weber's sociology of rationalization

**The McDonaldization of Society 6** George Ritzer, 2011 As one of the most noteworthy and popular sociology books of all time The McDonaldization of Society 6 demonstrates the power of the sociological imagination to 21st century undergraduates in a way that few other books have This engaging work of social criticism is praised for sparking debate in and out of the classroom and for allowing students to read in depth on a small number of fascinating topics and it vividly demonstrates the relevance of Weber's discussion of rationalization the basis

of McDonaldization to the everyday life of today's student. New and Retained Features Links a large number of social phenomena to McDonaldization, some which are directly impacted by the principles of the fast food chain and others where the effect is more tenuous. A new final chapter 10 on The DeMcDonaldization of Society examines the processes of deMcDonaldization and concludes that while it is occurring on the surface, McDonaldization is alive and well, for example in the structures that underlie Web 2.0. Many new and updated examples are from the digital world, keeping the text ultimately relevant for the contemporary student reader. Addresses the advantages of McDonaldization, then focuses on the problems and dangers it poses and looks at efforts to deal with those challenges. Examines the link between McDonaldization and globalization. Challenges the reader to rethink McDonaldization as part of the structure of society and to act to reverse the trend towards it.

**The Religious Ethic and Mercantile Spirit in Early Modern China** Ying-shih Yü, 2021-03-23 Why did modern capitalism not arise in late imperial China? One famous answer comes from Max Weber whose *The Protestant Ethic and the Spirit of Capitalism* gave a canonical analysis of religious and cultural factors in early modern European economic development. In *The Religions of China*, Weber contended that China lacked the crucial religious impetus to capitalist growth that Protestantism gave Europe. The preeminent historian Ying-shih Yü offers a magisterial examination of religious and cultural influences in the development of China's early modern economy, both complement and counterpoint to Weber's inquiry. *The Religious Ethic and Mercantile Spirit in Early Modern China* investigates how evolving forms of Buddhism, Confucianism, and Daoism created and promulgated their own concepts of the work ethic from the late seventh century into the Qing dynasty. The book traces how religious leaders developed the spiritual significance of labor and how merchants adopted this religious work ethic, raising their status in Chinese society. However, Yü argues, China's early modern mercantile spirit was restricted by the imperial bureaucratic priority on social order. He challenges Marxists who championed China's sprouts of capitalism during the fifteenth through eighteenth centuries, as well as other modern scholars who credit Confucianism with producing dramatic economic growth in East Asian countries. Yü rejects the premise that China needed an early capitalist stage of development; moreover, the East Asian capitalism that flourished in the later half of the twentieth century was essentially part of the spread of global capitalism. Now available in English translation, this landmark work has been greatly influential among scholars in East Asia since its publication in Chinese in 1987.

**Canons** Peter Baehr,2017-07-05 Founders classics and canons have been vitally important in helping to frame sociology s identity Within the academy today a number of positionsfeminist postmodernist postcolonialquestion the status of tradition In Founders Classics Canons Peter Baehr defends the continuing importance of sociology s classics and traditions in a university education Baehr offers arguments against interpreting defending and attacking sociology s great texts and authors in terms of founders and canons He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken Although he questions the uses to which the concepts of founder classic and canon have been put Baehr is not dismissive On the contrary he seeks to understand the value and meaning these concepts have for the people who employ them in the cultural battle to affirm or attack the liberal university tradition **The Vocation Lectures** Max Weber,2004-03-15

Originally published separately Weber s Science as a Vocation and Politics as a Vocation stand as the classic formulations of his positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber s central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity **The Social Science Encyclopedia** Adam Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of

German and American intellectuals in the twentieth century      *Comparative Methods in Sociology* Ivan Vallier, 2023-11-10

The essays in this volume are intended to help social scientists do better comparative research and thereby to improve our possibilities for creating more satisfactory explanations or theories. These broad aims are advanced throughout the book in several ways: 1 by an identification and assessment of the methodological strategies of exceptionally important comparativists past and present; 2 by an explication and refinement of logics of procedure that are central to many types of comparative research; 3 by a presentation of new research models that link or bridge heretofore separate lines of comparative inquiry; and 4 by the definition of methodological criteria by which theories and conceptual frameworks can be more fruitfully related to and qualified by comparative studies. Specific problems such as comparability, causal inference, conceptualization, measurement, and sampling are addressed in various sections of particular essays.
