Curriculum Improvement Ronald C. Doll, 1989 The Ninth Edition of Curriculum Improvement is comprehensive unique practical and thought provoking Despite the problems it cites the book offers a message of hope that schools can help to solve society s problems by impressing upon children and youth that they can achieve and succeed if they act in doing what **Teachers and Teaching** J. R. Hart, 2002 Teachers are blamed for many of society s they know to be right and productive ills They are accused of not successfully transforming our home products into brilliant socially upward success stories They fail to cultivate manners in our crude offspring and they are guilty of being unable to get our children to focus on their studies This book focuses on current issues in the teaching field **The State of Education in Canada** Thomas T. Schweitzer, Robert Kirby Crocker, Geraldine Gilliss, 1995 How good are Canadian schools What measurements should we use to evaluate the state of Canadian education This book discusses the state of schools in Canada in comparison to other countries as well as province to province It looks at the crucial elements in any educational system ranging from the family environment to the quality of teaching to the effectiveness of school bureaucracy It also stresses the importance of education in creating a well trained and efficient workforce and suggests that a high level of numeracy and literacy generates significant income premiums for Canadian workers Can Teachers Own Their Own Schools? Richard K. Vedder, 2000-07-01 Despite more than 15 years of effort it is widely acknowledged that internal reform of the public schools has produced little if any success This has led to renewed interest in alternative forms of educational delivery to devolve decision making through charter schools public and private voucher plans contracting out educational services and home schooling However such reforms have largely been resisted by public school interest groups including teacher unions state departments of education colleges of education and school board and administrator organizations that have fought any but the most benign changes Less attention has been given to another option that has been quietly growing in importance private for profit schools Firms in the private sector are typically more productive and responsive to consumer demands than their public sector counterparts Historically for profit schools have had a good track record and they are increasingly common today In Can Teachers Own Their Own Schools Richard Vedder examines the economics history and politics of education and argues that public schools should be privatized Privatized public schools would benefit from competition market discipline and the incentives essential to produce cost effective educational quality and attract the additional funding and expertise needed to revolutionize school systems Drawing inspiration from Margaret Thatcher's privatization of government council housing in England privatization reforms in Latin America and the E S O P Employee Stock Ownership Plan movement in the United States Vedder presents a bold plan in which teachers administrators and others involved in the educational process would become the owners of schools acquiring an attractive financial stake in the process Such privatization reforms could

empower those directly involved and affected by school performance and end interest group barriers paving the way for new cost effective means of improving educational outcomes As a result schools in which teachers administrators and parents have a significant financial stake would foster vibrant school communities with increased parental involvement and the innovation and efficiency essential to produce educational excellence
