neuroaesthetics Irving Massey examines this alliance in large part to allay the fears of artists and audiences alike that brain science may explain away the arts The first part of the book shows how neuroscience can enhance our understanding of certain features of art The second part of the book illustrates a humanistic approach to the arts it is written entirely without recourse to neuroscience in order to show the differences in methodology between the two approaches The humanistic style is marked particularly by immersion in the individual work and by evaluation rather than by detachment in the search for generalizations In the final section Massey argues that despite these differences once the reality of imagination is accepted neuroscience can be seen as the collaborator not the inquisitor of the arts

Michael Ruse,2023-06-01 The relationship between science and religion is a topic that runs rife with misconceptions misunderstandings and debates Are science and religion always in conflict Is Darwin s theory of evolution through natural selection atheistic How does history shape current debates around science and religion This book explores these questions in a neutral and balanced way focusing on the Christianity evolution relationship It shows that two paradigms the world as an organism and the world as a machine have critically informed and guided the discussions The author uses his deep understanding of the history and philosophy of science particularly Darwinian evolutionary theory and its controversies through the past 150 years to bring fresh ideas to the debate and to wider discussions such as environmental issues and hate Understanding the Christianity Evolution Relationship provides a lively and informative analysis and lays out multiple views so that readers can make their own judgements to increase their understanding
