world's longest ruling Communist regime China is undergoing a transitional period of rapid economic and social development. How this period is managed will have significant implications for the Chinese state and its population concerning China's governance structures and economy as well as the country's justice, public health, education and internal external security concerns. This transition to a modern state is not without its challenges particularly in terms of how the Chinese state deals with diverse issues such as social inequality, corruption, separatism, increasing individualism and political reform. China's governance and domestic politics also have possible major global consequences especially in the context of China's continued rise within the international system. This Handbook will improve understandings of the core national dynamics of this rise and as levels of international interdependence with China increase can offer vital insights concerning China's domestic attributes. Gaining a better knowledge of China's internal workings can also help better appreciate the multiple and varied problems that China's leaders will face in the coming decades. Critically many of the core internal issues facing China also have potential external repercussions principally in terms of rising social unrest, nationalism, environmental degradation, resource shortages and attitudes towards globalization. This book aims to cover these issues and will help readers to fully comprehend China's ongoing contemporary global significance.

Localizing Governance in India Bidyut Chakrabarty, 2017-02-17 Participatory governance has a long history in India and this book traces historical intellectual trajectories of participatory governance and how older Western discourses have influenced Indian policymakers. While colonial rulers devolved power to accommodate dissenting voices for independent India, participatory governance was a design for democratizing governance in its true sense. Participation also acted as a vehicle for localizing governance. The author draws on both Western and non-Western theoretical treatises and the book seeks to conceptualize localizing governance also as a contextual response. It also makes the argument that despite being located in different socio-economic and political milieu, thinkers converge to appreciate localizing governance as perhaps the only reliable means to democratize governance. The book aims to confirm this argument by reference to sets of evidence from the Indian experience of localizing governance. By attempting a genealogy of participatory governance in the West and in India and an empirical study of participatory governance in India, the book sheds light on the exchange of ideas and concepts through space and time, thus adding to the growing body of literature in the social sciences on conceptual flow. It will be of interest to political scientists and historians, in particular those studying South Asia.

Defunct Federalisms Emilian Kavalski, Magdalena Zolkos, 2016-05-13 Since the end of the Cold War, the global arena has become a place for dynamic change, in particular for federal political units. The focus on defunct federalisms draws attention not only to the difference between state making and nation building, it also points to the fact that state making does not necessarily lead to the creation of a national identity. This comparative volume looks at the track record of several defunct federalisms to identify

options that have been overlooked and decisions that precipitated the collapse Bringing together insights from the study of state failure and federal collapse it examines the ways in which parallel assessment is crucial for suggesting the complex structures of identity accommodation in federal entities The volume is ideal for advanced undergraduates and graduate students as well as university lecturers and researchers working on the issues related to contemporary federalism history of federal units and the questions of national identity Model Workers in China, 1949-1965 James Farley, 2019-06-04 Seismic changes in ideology and economic policy in China followed the death of Mao Zedong but one aspect of culture has remained constant the use of Model Workers for the purposes of propaganda and more recent public relations campaigns In both a political and commercial context the use of these individuals continues to thrive and although the messages they promote have largely changed their continued use indicates the extent to which they are believed to be an effective form of persuasion Model Workers were deployed at key points in China's recent history and served to embody the Party's vision of the ideal Chinese citizen as they attempted to reshape the nation following a Century of Humiliation a ruinous war with Japan and a divisive civil war This volume utilises the detailed analysis of posters cinema and translations of related propaganda material to explore the extent of the influence of the Model Worker as a concept on both propaganda and national policy

Joint Publications Research Service, 1966 *Making It Count* Arunabh Ghosh, 2022-01-11 Among the biggest challenges facing leaders of the newly established People's Republic of China PRC was how much they did not know In 1949 at the end of a long sequence of wars the government of one of the largest states in the world committed to fundamentally re-engineering its society and economy via socialist planning while having almost no hard reliable statistical data about their own country This book is a history of attempts made to resolve this crisis in counting Drawing on a wealth of official institutional and private sources culled from China India and the United States the author explores the choices made and the effects they engendered through a series of vivid encounters with political leaders professional statisticians academics ordinary statistical workers and even literary figures Early reliance on Soviet inspired methods of enumeration became increasingly untenable in China by the middle of the 1950s A series of unprecedented and unexpected exchanges with Indian statisticians followed as the

Chinese sought to learn about the then exciting new technology of random sampling. These developments were in turn overtaken by the tumult of the Great Leap Forward 1958-1961 when both probabilistic and exhaustive methods were rejected and statistics was refashioned into an essentially ethnographic enterprise. The author argues that this history usually narrowly described as a universal if European history cannot be understood without acknowledging Soviet and Indian influences which not only revises existing models of Cold War science but also globalizes the wider developments in the history of statistics and data. For historians of China and social science and political scientists, sociologists and anthropologists studying modern China. *Politics of the 'Other' in India and China* Lion Koenig, Bidisha Chaudhuri, 2016-02-22

The social sciences have been heavily influenced by modernization theory focusing on issues of economic growth, political development and social change in order to develop a predictive model of linear progress for developing countries following a Western prototype. Under this hegemonic paradigm of development, the world tends to get divided into simplistic binary oppositions between the West and the rest, us and them, and self and other. Proposing to shift the discussion on what constitutes the Other as opposed to the Self from philosophy and cultural studies to the social sciences, this book explores how the structural asymmetries existing between Western discourses and the realities of the non-Western world manifest themselves in the ideas, institutions and socio-political practices of India and China and in how far they shape the social scientist's understanding of their discipline in general. It provides a counter narrative by revealing the relativity of geographies and by showing that the conventional presentation of core elements of the Asian socio-political set up as aberrations from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements. Drawing on multiple disciplines, concepts and contexts in India and China, the book makes a valuable contribution to the theory and practice of politics as well as to International and Asian Studies. **Endogenous Origins of**

Economic Reforms in India and China Rajiv G. Maluste, 2011-07. Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005, DeLong 2003, Kohli 1989 and Panagariya 2004, 2008. This dissertation provides empirical support for this literature, establishing an earlier start for India's economic policy liberalisation than presented in stylized accounts. It demonstrates the endogenous nature of the origins of these policy shifts. Attitudinal change literature had directed attention to the need for further research into India's policy changes of the early 1980s and for studying broader comparability issues in other developing countries. This research makes a contribution towards filling these gaps. This dissertation shows that India started its economic liberalisation under the Indira Gandhi administration from 1980 to 1984. These findings depart from the conventional view that India's economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s. The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership's attitudinal changes. The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977. The

new approach entailed more openness towards private enterprise scaling back the role of the public sector and starting India's integration into the global economy The dissertation also discusses the comparable role of attitudinal changes at the start of China's policy liberalisation led by Deng Xiaoping from 1978 to 1982 It focuses on the significance and challenges faced by China's political leadership in bringing about societal attitudinal change The dissertation concludes by drawing comparisons between India and China developing a linkage between their endogenous attitudinal changes and economic policy liberalisation

Moulding the Socialist Subject Xiaoning LU, 2020-02-03 What role did cinema play in the Chinese Communist Party's political project of shaping ideal socialist citizens in the early People's Republic In *Moulding the Socialist Subject* Xiaoning Lu deploys case studies from popular film genres movie star culture and rural film exhibition practices to argue that Chinese cinema in 1949-1966 at once an important political instrument an enjoyable yet instructive form of entertainment and a specific manifestation of the socialist society of the spectacle was an everyday site where the moulding of the new socialist person unfolded While painting a broad picture of Chinese socialist cinema Lu credits the human agency of film professionals whose self-reflexivity and individual adaptability played an intrinsic role in the Party's political project

Curating Under Pressure Janet Marstine, Svetlana Mintcheva, 2020-07-14 *Curating Under Pressure* breaks the silence surrounding curatorial self-censorship and shows that it is both endemic to the practice and ubiquitous Contributors map the diverse forms such self-censorship takes and offer creative strategies for negotiating curatorial integrity This is the first book to look at pressures to self-censor and the curatorial responses to these pressures from a wide range of international perspectives The book offers examples of the many creative strategies that curators deploy to

negotiate pressures to self censor and gives evidence of curators political acumen ethical sagacity and resilience over the long term It also challenges the assumption that self censorship is something to be avoided at all costs and suggests that a decision to self censor may sometimes be politically and ethically imperative Curating Under Pressure serves as a corrective to the assumption that censorship pressures render practitioners impotent It demonstrates that curatorial practice under pressure offers inspiring models of agency ingenuity and empowerment Curating Under Pressure is a highly original and intellectually ambitious volume and as such will be of great interest to students and academics in the areas of museum studies curatorial and gallery studies art history studio art and arts administration The book will also be an essential tool for museum practitioners
