Selected Writings Of Gilbert F Whit Volume 1:

Geography, Resources and Environment, Volume 1 Gilbert F. White, 1986 Gilbert F White is the preeminent geographer of natural resources hazards and the human environment During fifty years of professional work as civil servant scientist and educator he authored numerous books and papers This volume is the first collection of White s work spanning his interests and career from 1934 to 1984 Individual introductions by the editors place each selection in historical perspective and assay its significance With the companion volume Theme from the Work of Gilbert F White White s writings and the work that he inspired are now readily accessible to all who share his concern for the stewardship of the earth

Living with Nature's Extremes Robert E. Hinshaw, 2006 Gilbert White has been called the most renowned geographer internationally of the twentieth century and one who personifies the ideal of a natural resources scientist committed to the stewardship of our planet He has educated the nation and the world on how to change the ways we manage water resources mitigate natural hazards and assess the environment

The Republic of Adygea Environment Murat K. Bedanokov, Sergey A. Lebedev, Andrey G. Kostianoy, 2021-05-21 This book outlines the current status of the environment in the Republic of Adygea in Russia The book assesses the environmental conditions ecological state climate and vegetation change anthropogenic loads to soil water and atmosphere as well as highlighting the potential of water resources renewable energy and development of tourism agriculture and industry in this region It also presents the mechanisms of legal ecological and economic regulation and environmental insurance in the Republic of Adygea This book introduces the Republic of Adygea to readers who are not familiar with the Republic and its beautiful landscapes history and people It offers a valuable source of information for a broad readership from students and scientists interested in environmental sciences to policymakers and practitioners working in the fields of environmental policy and management

America's Renewable Resources Kenneth D. Frederick, Roger A. Sedjo, 2013-10-18 By recording one country s experience with its vast natural resource base America s Renewable Resources Historical Trends and Current Challenges will help to inform the management of future demands on the resource base in the U S and throughout the world The contributors focus specifically on renewable resources water forests rangeland cropland and soils and wildlife which possess the capacity to restore themselves after they have be consumed Because this capacity can be destroyed and the time required for restoration can be very long a balance in their use is necessary to sustain continued productivity In arresting fashion the authors trace the history of each resource s use from early colonial times through periods of dramatic sometimes cataclysmic changes in its utilization by an expanding diversifying society They show how unforeseen consequences have forced social institutions into existence and compelled policy makers especially at the federal level to deal with problems for which they were largely unprepared America s Renewable Resources by examining changes in demand technologies policies and institutions will assist both policy makers and the public at large to look past short term events to the conditions fundamental to maintaining our future economic and

environmental wellbeing Originally published in 1991

Unifying Geography David T. Herbert, John A.

Matthews, 2004-08-05 It can be argued that the differences in content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will give the discipline renewed strength and direction thus improving its status both within and outside geography

Modern Geography Gary S. Dunbar, 2016-02-05 This book charts the developments in the discipline of geography from the 1950s to the 1980s examining how geography now connects with urban regional and national planning and impacts on areas such as medicine transport agricultural development and electoral reform The book also discusses how technical and theoretical advancements have generated a renewed sense of philosophic reflection a concern closely linked with the critical examination and development of social theory

islands Flood plains Earthquake faults Sometimes the environment poses threats to our well being yet many of us continue to
choose to live in risky or dangerous places And on top of the knowns are the other more hidden hazards related to
environmental contamination that pose equally serious threats to our health and well being But where are these places and
what types of hazards are found there American Hazardscapes examines the risks associated with living and owning property
in diverse regions across the United States offering dual perspectives that of the geographer and that of the social science
hazards researcher The book summarizes what we already know about regional patterns of hazard events and losses during
the previous three decades and goes further to shed light on the nature of the events themselves and their impact on society
Written for the relocating citizen and the policy maker alike American Hazardscapes presents a regional ecology of disaster
prone or disaster resistant states It also offers thoughts on what local state and federal managers need to do to meet the
challenge of reducing hazard losses in the next century
