Selected Papers Of C C Lin With Commentary (In 2 Volumes) Yuan Chi, David J Benney, Frank H Shu, 1987-08-01 One of the most prolific applied mathematicians of the mid twentieth century Prof Lin is a highly respected professor at MIT These volumes a collection of Prof Lin s papers from 1943 to 1986 is an attempt to exhibit a historical perception of the development of ideas in the following areas of research Stability of Parallel Flows Turbulence Spiral Structure of Galaxies Prof Lin has written short comments and personal recollections on the development of thinking in these subjects In addition to research papers there are two essays dealing with the basic thinking that underlies the development of applied mathematics as an academic discipline in USA Other topics of interest are Aerodynamics Liquid Helium Solid State Physics Plasticity and Magnetohydrodynamics About 51 papers are included in these two volumes Selected Papers Of M Ohya Noboru

Watanabe, 2008-02-19 This volume is a collection of articles written by Professor M Ohya over the past three decades in the areas of quantum teleportation quantum information theory quantum computer etc By compiling Ohya s important works in these areas the book serves as a useful reference for researchers who are working in these fields **EPSA15 Selected**

Papers Michela Massimi, Jan-Willem Romeijn, Gerhard Schurz, 2017-04-26 This edited collection showcases some of the best recent research in the philosophy of science It comprises of thematically arranged papers presented at the 5th conference of the European Philosophy of Science Association EPSA15 covering a broad variety of topics within general philosophy of science and philosophical issues pertaining to specific sciences The collection will appeal to researchers with an interest in the philosophical underpinnings of their own discipline and to philosophers who wish to study the latest work on the themes discussed **Murray Gell-mann - Selected Papers** Harald Fritzsche, 2010-02-08 Murray Gell Mann is one of the leading

physicists of the world He was awarded the Nobel Prize in Physics in 1969 for his work on the classification and symmetries of elementary particles including the approximate SU 3 symmetry of hadrons His list of publications is impressive a number of his papers have become landmarks in physics In 1953 Gell Mann introduced the strangeness quantum number conserved by the strong and electromagnetic interactions but not by the weak interaction In 1954 he and F E Low proposed what was later called the renormalization group In 1958 he and R P Feynman wrote an important article on the V A theory of the weak interaction In 1961 and 1962 he described his ideas about the SU 3 symmetry of hadrons and its violation leading to the prediction of the particle In 1964 he proposed the quark picture of hadrons In 1971 he and H Fritzsche proposed the exactly conserved color quantum number and in 1972 they discussed what they later called quantum chromodynamics QCD the gauge theory of color These major publications and many others are collected in this volume providing physicists with easy access to much of Gell Mann s work Some of the articles are concerned with his recollections of the history of elementary particle physics in the third quarter of the twentieth century Selected Papers Of Richard Feynman (With Commentary)

Laurie M Brown, 2000-10-25 These scientific papers of Richard Feynman are renowned for their brilliant content and the

author's striking original style They are grouped by topic path integral approach to the foundations of quantum mechanics and quantum field theory renormalized quantum electrodynamics theory of superfluid liquid helium theory of the Fermi interaction polarons gravitation partons computer theory etc Comments on Feynman's topics are provided by the editor together with biographical notes and a complete bibliography of Feynman's publications

Selected Papers of K C Chou Yue-Liang Wu, 2009 This volume presents a collection of selected papers written by Prof Chou The papers are organized into four parts according to the subject of research areas and the language of publishing journals Part I in English and Part III in Chinese are papers on field theories particle physics and nuclear physics Part II in English and Part IV in Chinese are papers on statistical physics and condensed matter physics From the published papers it illustrates and is clearly evident how Prof Chou was constantly at the frontiers of theoretical physics in various periods and carried out creative research works experimenting with initial ideas and motivations as well as how he has driven and worked in different key research directions of theoretical physics all for which he has made significant contributions to various interesting research areas and interdisciplinary fields

Physical Processes in the Coastal Zone Arthur P. Cracknell, E.S. Rowan, 1989-01-01 As people come to realize the importance of the environmental impact of human activities the study of the coastal zone has become increasingly important In addition new environmental legislation at regional national and international levels will doubtless highlight the importance of a fuller understanding of the coastal areas Together these factors have led to substantial new requirements for the acquisition and monitoring of relevant environmental information and for a fuller understanding of the processes at work work for which the use of remote sensing techniques is essential To meet the requirements of this emerging discipline Physical Processes in the Coastal Zone Computer Modelling and Remote Sensing integrates basic physical processes with extensive information from remote sensing systems such as those on aircraft and spacecraft It covers the physical processes that occur in the coastal zone an area in which 60% of the world's population live Written by international experts the text provides a comprehensive graduate level introduction and overview that is suitable both for those entering the field and for those already working within it
