Recent Advances in Attempts to Improve Medication Adherence - from basic research to clinical practice, volume II Przemyslaw Kardas, Tamas Agh, Ines Potočnjak, Cristina

Mihaela Ghiciuc, Maria Teresa Herdeiro, 2024-12-04 This exciting Research Topic is the second volume of Recent Advances in Attempts to Improve Medication Adherence from basic research to clinical practice which you can explore here Adequate implementation of evidence based long term therapies is an issue of utmost importance It has a direct impact on both individual and public health as well as on the sustainability of healthcare systems Unfortunately despite more than half a century of extensive research and practical and awareness raising activities medication adherence remains far from perfect Many reasons are responsible for non adherence and the issue is complicated by the rapid aging of the global society the rising tide of non communicable chronic diseases multimorbidity and associated polypharmacy This might be further exacerbated by certain conditions such as the Covid 19 pandemic However one thing is perfectly clear medication non adherence is no longer merely perceived as a patient problem In fact medication adherence depends on many non patient related factors and thus is an important indicator of the quality of care Therefore instead of blaming patients need to be supported in their therapeutic journeys Thus all the stakeholders need to collectively create adherence enabling environments and support patients in the execution of their therapies

Recognition and Prevention of Major Mental and Substance Use Disorders American Psychopathological Association, 2007-05-03 Recognizing that favorable clinical outcomes are associated with earlier initiation of treatment and even more ideally with prevention this volume addresses the current status of early intervention in and prevention of major mental and substance use disorders A

team of distinguished participants addresses this problem at many levels from the DNA molecule to public policy in order to show how prevention efforts should be informed by a better understanding of etiology and by a knowledge of indicators of vulnerability In considering the current standing of etiological knowledge Recognition and Prevention of Major Mental and Substance Use Disorders addresses issues that are critical precursors to the prevention of mental disorders and offers an understanding of factors that contribute to the disorders development The contributors review genetic methodologies and current findings in mental disorders with an emphasis on schizophrenia and then show how biological and psychosocial environmental variables may affect vulnerability Chapters devoted specifically to lessons in prevention drawn from recent research into schizophrenia discuss the implications of prodromal studies and relationships between stress critical periods and the development of the disorder The book includes contributions from NIH representatives on how basic scientific understanding of mental disorders can be translated into public policy It also features chapters that describe cutting edge projects in prevention research for Alzheimer s disease drug dependence antisocial behavior and posttraumatic stress disorder each providing compelling accounts of how existing knowledge can be adapted to promising prevention efforts Among the volume s contributions New data on the role of substance abuse particularly marijuana and psychostimulants in increasing vulnerability to schizophrenia Review of vulnerability factors for several relevant disorders examining stress and its concomitant psychobiological responses and the contribution of cognitive factors to vulnerability to depression Intriguing approach for translating successful treatment methods for schizophrenia into efforts to prevent the transition from the prodrome of the disorder to the full blown illness Program for prevention of antisocial behavior that can be implemented as early as the first grade Secondary prevention efforts for posttraumatic stress disorder with a focus on pharmacological interventions Each chapter reviews clinical implications of the research presented contributing to a volume that will benefit clinicians and researchers who share the goal of preventing these debilitating conditions This multidimensional interdisciplinary work represents a major step toward cutting the social costs of these disorders and more important their untold cost in human suffering

Advances in Integrative Medicine for Neurodegenerative Diseases: From Basic Research to Clinical Practice Shoonan Liu,Guo-qing Zheng,Hansen Chen,Guowei Li,Xinfeng Guo,2024-03-08 Neurodegenerative diseases NDs are disorders characterized by progressive loss of neurons and may finally lead to severe impairments even death NDs are age dependent disorders growing evidence suggests that nearly all aged brains exhibit characteristic changes that are associated with neurodegeneration As the global rapidly aging population the prevalence of NDs is which have become the most dreaded disease of aged people Studies report that the expenses of these older patients with NDs exceed the total medical expenses of patients with cancer and cardiovascular diseases

Unmet Need in Psychiatry Gavin Andrews,Scott Henderson,2000-01-06 This book considers ways to resolve the imbalance between the demand and supply of mental health services Treatment services in most countries reach only a minority of people identified as suffering from a

mental disorder Few countries can provide adequate health services for all the mentally ill yet none has developed a rational system to decide who should be treated The questions are clear Could we develop a staged treatment process to reach all in need If not how do we decide who to treat What should the criteria be for deployment of scarce treatment resources How do we determine such criteria What are the ethical implications of applying such criteria In this pioneering work an international team of eminent psychiatrists epidemiologists health administrators economists and health planners examine these questions The result will inform and encourage all concerned with the equitable provision of mental health care

The Psychology of Food Choice Richard Shepherd, Monique Raats, 2006-01-01 Written by leading international experts this book explores one of the central difficulties faced by nutritionists today how to improve people's health by getting them to change their dietary behaviour It provides an overview of the current understanding of consumer food choice by exploring models of food choice the motivations of consumers biological learning and societal influences on food choice and food choices across the lifespan It concludes by examining the barriers to dietary change and how nutritionists can best impact upon dietary behaviour

Feighner, Ruth Ross, 2012-12-06 A comprehensive review of the current status of antidepressants how we arrived at this point in their evolution and where we are going in both the near and the long term It employs both a scientific and historical approach to accomplish these goals This volume is intended for practitioners who use antidepressants on a daily basis in their practice as well as for the student and researcher Each will find that it provides a comprehensive and logical approach to this important group of medications This book is being published as we mark the end of the first 50 years of the modern antidepressant era

Understanding Psychosocial Adjustment to Chronic Illness and Disability Fong Chan, Elizabeth Da Silva Cardoso, Julie Chronister, Julie A. Chronister, 2009-06-16 Rehabilitation practitioners face the difficult task of helping clients adjust to chronic illness or disability This can be a long and trying process for both practitioner and client With this handbook however practitioners and students can gain a wealth of insight into the critical issues clients face daily This book presents the dominant theories models and evidence based techniques necessary to help the psychosocial adjustment of chronically ill or disabled persons Each chapter is written from an evidence based practice EBP perspective and explores how important issues i.e. social stigma social support sexuality family depression and substance abuse affect persons adjusting to chronic illness and disability Key features include A review of psychopharmacological treatment options for depression anxiety and other disorders coinciding with rehabilitation The effect of rehabilitation on the family including key family intervention strategies Strategies for using positive psychology and motivational interviewing in rehabilitation Multiculturalism and the effect of culture on the adjustment process Ancillary materials including an instructor's manual with a syllabus examination items PowerPoint presentation and answers to class exercises By incorporating research based knowledge into clinical rehabilitation practice health care professionals can ensure that people with chronic illness and

disability receive only the best treatment Mental Disorders of the New Millennium Thomas G. Plante Ph.D.,2006-08-30 Tragically the daily news is filled with stories about hurtful and seemingly mystifying problems in human behavior Each morning we face news stories about murder suicide drunken driving accidents child molestation drug abuse gambling criminal behavior and so forth The cover stories of news magazines from Time and Newsweek to U S News and World Report often focus on abnormal psychology and behavior connected to these particular topics as well as to autism child hyperactivity depression eating disorders and more In these volumes experts in their respective fields draw together compelling chapters on the abnormal psychology and resulting behaviors that are today most often and most dramatically at issue in our world including such topics as workaholism Written with accessibility in mind the set is intended to bridge the gap between research monographs and self help books to give layreaders and students solid and up to date information without having to translate jargon heavy text Most people today are impacted by abnormal behavior or mental illness in some way Some suffer from their own mental disorders or live with someone who does Others have been victimized by people experiencing abnormal psychology including the 20% of American women and 15% of American men reporting they were sexually abused as children Mental illness and abnormal behavior touches all of us This set can help us cope **The how of Happiness** Sonja Lyubomirsky,2008 A life changing approach to increasing happiness and fulfillment in everyday life redefines what happiness is and what it is not and introduces activities that emphasize staying active including exercises in practicing optimism **Health and Work Productivity** Ronald C. Kessler,Paul E. Stang,2006-04 Presents health and productivity research that suggests interventions aimed at prevention early detection and best practice treatment of workers with promising cost benefits for employers Covers approaches to studying effects of health on productivity ways for employers to estimate productivity loss suggestions for future research and implications for public policy *Stress, the Brain and Depression* H. M. van Praag,E. R. de Kloet,J. van Os,2004-05-20 Can traumatic life events cause depression Studies generally point to a connection between adverse life events and depression However establishing a causal rather than associative connection the key concern of this book is more problematic What neurobiological changes may be induced by stress and depression and to what extent do these changes correspond The authors structure their examination around three major themes the pathophysiological role of stress in depression whether or not a subtype of depression exists that is particularly stress inducible and finally how best to diagnose and treat depression in relation to its biological underpinnings *Global Health* Michael H. Merson,Robert E. Black,Anne J. Mills,2011-08-19 The Third Edition formerly titled International Public Health brings together contributions from the world s leading authorities into a single comprehensive text It thoroughly examines the wide range of global health challenges facing low and middle income countries today and the various approaches nations adopt to deal with them These challenges include measurement of health status infectious and chronic diseases injuries nutrition reproductive health global environmental health and complex emergencies This thorough revision

also explores emerging health systems their financing and management and the roles of nation states international agencies the private sector and nongovernmental organizations in promoting health Your students will come away with a clear understanding of how globalization is impacting on global health and of the relationship between health and economic development Emotions and their influence on our personal, interpersonal and social experiences Ami Rokach,2018-10-19 Research indicates that each emotion is associated with cognitive appraisals that influence our decision making our behavior and our relationships Positive emotions may enhance our point of view and affect our decision to execute what we meant to Negative emotions are known to not only affect the manner in which we view the world but our plans our willingness to interact with others and our choices both behaviorally and cognitively Emotions are also known to affect us physically Positive emotions support our immune system are responsible for our health enhancing behavior and allow us to be open to our social support network Negative emotions are known to hamper our immune system and thus make us more prone to illnesses sometimes life threatening ones and interfere with successfully coping with them This book focuses on the role of emotions in everyday life and particularly the destructive effects of negative emotions such as anger anxiety depression and the fear of death that humans share The articles in this book were originally published in the Journal of Psychology Interdisciplinary and Applied Depression Steven E. Hyman,2013-10-15 First Published in 2002 In common usage the term depression can refer to the state of being sad or blue but it also signifies a serious clinical syndrome that affects approximately 10 percent of people at some point in their lives This clinical syndrome may occur as a primary illness or as a complication of secondary to another mental disorder such as schizophrenia a medical condition such as hypothyroidism or the effects of a drug Based on studies of clinical courses and outcomes treatment responses and familial patterns of depression primary depressive illness is dichotomized into unipolar depressions only and bipolar In bipolar disorder or manic depressive illness depressions are interspersed with manias periods of elevated mood high energy and lack of sleep Bipolar disorder is described in a separate volume **Material Feminisms** Stacy Alaimo,Susan J. Hekman,2008-01-02 Harnessing the energy of provocative theories generated by recent understandings of the human body the natural world and the material world Material Feminisms presents a way for feminists to conceive of the question of materiality **Gut Feminism** Elizabeth A. Wilson,2015-09-17 In Gut Feminism Elizabeth A Wilson urges feminists to rethink their resistance to biological and pharmaceutical data Turning her attention to the gut and depression she asks what conceptual and methodological innovations become possible when feminist theory isn't so instinctively antibiological She examines research on antidepressants placebos transference phantasy eating disorders and suicidality with two goals in mind to show how pharmaceutical data can be useful for feminist theory and to address the necessary role of aggression in feminist politics Gut Feminism's provocative challenge to feminist theory is that it would be more powerful if it could attend to biological data and tolerate its own capacity for harm
