Selective Immunosuppression: Basic Concepts and Clinical Applications L. Adorini,1994 **The Journal of Immunology** ,1996 *Pediatrics in Systemic Autoimmune Diseases* Rolando Cimaz,Thomas J.A. Lehman,2016-06-08

Pediatrics in Systemic Autoimmune Diseases Second Edition provides a good starting point for physicians and scientists new to the field and for anyone looking for the most up to date summary of a particular disease While many questions are answered many more are raised for which we do not yet have the answers The book provides inspiration to readers conducting their own research and helps to answer their questions The care of children with systemic autoimmune diseases is moving forward at a rapid pace The systemic autoimmune diseases of childhood have always represented a special problem for the physicians and scientists who care for the affected children and study their diseases Some conditions such as Kawasaki disease are virtually unique to childhood while systemic lupus erythematosus progressive systemic sclerosis and juvenile onset spondyloarthropathies may be thought of as the early onset of the same disease which is seen in adults The autoinflammatory disorders appear to be of clear genetic origin accounting for their frequent discovery in childhood For many other conditions such as juvenile dermatomyositis the relationship between the conditions seen in children and that seen in adults is less certain This book explores these phenomena giving users a foundation on which to understand certain diseases Includes completely updated chapters and five new chapters Explains the differences in systemic autoimmune diseases seen in children vs those seen in adults Covers the latest advances in pathogenesis and clinical management of common conditions seen in pediatric rheumatology practices benefiting both pediatric and adult rheumatologists as well as physicians from other specialties Brings the reader up to date and allows easy access to individual topics in one place Provides the latest information available in a format that would give the clinician both a clear understanding of what has been done in the past and a scientific basis for deciding what to do for the next afflicted child in their care

Skin Immune System (SIS) Jan D. Bos,1997-04-10 Immunodermatology is a field covering the majority of skin diseases including the most prevalent ones in the general population The Second Edition of Skin Immune System SIS discusses immune mediated skin diseases and disease groups in which the SIS plays a role It covers major findings in immunophysiology and immunopathology that have occurred since the introduction of the First Edition in 1990 As the subtitle indicates the Second Edition adds a new emphasis on cutaneous immunology and also includes new information on immune based therapeutic interventions and methods such as phototherapy and the immunological therapy of skin cancer The book contains Part I with introductory chapters Part II with descriptions of the cellular elements and Part III which describes the humoral and molecular components of SIS Part IV follows to integrate the facts described in Parts II and III into concepts of pathophysiology It contains a number of concepts entitled response patterns that describe how the constitutional elements of SIS work together New in this edition are the descriptions of immunodermatological diseases individually described in Part V

Part VI is also all new and summarizes principles of immunotherapy *Autologous Stem Cell Transplantation* Angelo Carella, 2020-08-26 This textbook integrates basic research and clinical aspects underlying the most recent results in those malignant diseases where progress is most effective Recent evidence shows that higher doses are better in inducing higher cure rates in hematological neoplasias although myeloblation related to dose intensity can be a limiting factor The toxicity can now be controlled with autologous marrow and peripheral blood progenitor cell transplantation used with or without growth factors The combination of high dose chemoradiotherapy followed by re infusion of autologous stem cells constitute a dramatic advance in the treatment of refractory and relapse hematological neoplasias *Journal of Investigational Allergology & Clinical Immunology*, 1995 Antibody Therapeutics William J. Harris, John R.
