the application of object relations theories to fields outside of psychoanalysis Psychoanalytic Books A Quarterly Journal of Reviews A Jason Aronson Book Object Relations Theory and Self Psychology in Social Work Practice Eda Goldstein, 2001

Object Relations and Self Psychology are two leading schools of psychological thought discussed in social work classrooms and applied by practitioners to a variety of social work populations Yet both groups have lacked a basic manual for teaching and reference until now For them Dr Eda G Goldstein s book fills a void on two fronts Part I provides a readable systematic and comprehensive review of object relations and self psychology while Part II gives readers a friendly step by step description and illustration of basic treatment techniques For educators this textbook offers a learned and accessible discussion of the major concepts and terminology treatment principles and the relationship of object relations and self psychology to classic Freudian theory Practitioners find within these pages treatment guidelines for such varied problems as illness and disability the loss of a significant other and such special problems as substance abuse child maltreatment and couple and family disruptions In a single volume Dr Goldstein has met the complex challenges of education and clinical practice , **Fairbairn's Object Relations Theory in the Clinical Setting** David P. Celani, 2010-04-07 W R D

Fairbairn 1889 1964 challenged the dominance of Freud s drive theory with a psychoanalytic theory based on the internalization of human relationships Fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental neglect insensitivity and outright abuse that are impossible the children to tolerate consciously In Fairbairn s model these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents Attachment is paramount in Fairbairn s model as he recognized that children are absolutely and unconditionally dependent on their parents Kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence At the heart of Fairbairn s model is a structural theory that organizes actual relational events into three self and object pairs one conscious pair the central ego which relates exclusively to the ideal object in the external world and two mostly unconscious pairs the child s antilibidinal ego which relates exclusively to the rejecting parts of the object and the child s libidinal ego which relates exclusively to the exciting parts of the object The two dissociated self and object pairs remain in the unconscious but can emerge and suddenly take over the individual s central ego When they emerge the other is misperceived as either an exciting or a rejecting object thus turning these internal structures into a source of transferences and reenactments Fairbairn s central defense mechanism splitting is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego a near perfect model of the borderline personality disorder In this book David Celani reviews Fairbairn s five foundational papers and outlines their application in the clinical setting He discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview Incorporating decades of experience into his analysis Celani emphasizes the internalization
