Kathleen Snow went directly to the source the National Park Service archives With help from personnel at park headquarters Snow has collected more than 100 years worth of harrowing true stories that read like crime scene investigations and provide hard learned lessons in outdoor safety A must read for fans of Taken by Bear in Yellowstone and the classic Bear Attacks Their Causes and Avoidance by Stephen Herrero Law and Nature David Delaney,2003-10-13 This interdisciplinary study explores the relationship between conceptions of nature and largely American legal thought and practice It focuses on the politics and pragmatics of nature talk as expressed in both extra legal disputes and their transformation and translation into forms of legal discourse tort property contract administrative law criminal law and constitutional law Delaney begins by considering the pragmatics of nature in connection with the very idea of law and the practice of American legal theorization He then traces a set of specific political legal disputes and arguments The set consists of a series of contexts and cases organized around a conventional distinction between external and internal nature forces of nature endangered species animal experiments bestiality reproductive technologies genetic screening biological defenses in criminal cases and involuntary medication of inmates He demonstrates throughout that nearly any construal of nature entails an interpretation of what it is to be distinctively human *Loving the World Appropriately* James L. Kastley,2022-12-08 A revolutionary approach to rhetoric that asks why audiences need persuading What is persuasion For some it is the ideal alternative to violence For others persuasion is simply a neutral instrumentality a valued source of soft power Both positions rest on a fundamental belief persuasion is a power that resides in a speaker acting on an audience *Loving the World Appropriately* asks a different more fundamental question why does an audience need persuasion In shifting our focus James Kastely delivers a provocative new history of rhetoric and philosophy one that describes rhetoric as more than a matter of effective communication and recasts persuasion as a philosophical concern central to notions of human subjectivity Ultimately Kastely insists persuasion enables us to love the world appropriately **Grasping Land** Eyal Ben-Ari,Yoram Bilu,2012-02-01 This volume explores various processes associated with constructing what has variously been called The Holy Land Eretz Israel Zion Palestine or Israel The contributors focus on ways the landscapes of Israel figure in creating and recreating the identity presence and history of groups living there The book critiques the assumptions lying at the base of various spatial practices related to Zionism It does this through both a theoretical examination and a focus on hitherto little explored phenomena such as pilgrimages of Israelis to their or their relatives native lands abroad the establishment of Jewish saints tombs in Israel the design of Kibbutz museums country hikes and conceptions of territory in mixed Jewish Arab communities *Connection to Nature, Deep Ecology, and Conservation Social Science* Christian Diehm,2020-12-15 In *Connection to Nature Deep Ecology and Conservation Social Science* Human Nature Bonding and Protecting the Natural World Christian Diehm analyzes the relevance of the philosophy of deep ecology to contemporary discussions of human nature connectedness Focusing on deep ecologists notion of identification with nature Diehm argues that deep ecological

theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails what its attitudinal and behavioral effects might be and how it might be nurtured and developed This book is closely informed by and engages at length with conservation social science which Diehm draws on to assess the claims of deep ecology theorists resolve long standing problems associated with their work investigate the impacts of time outdoors on human nature bonding and critically review the biophilia hypothesis Emphasizing the foundational role of ecologically inclusive identities in pro environmental attitudes and behaviors Diehm demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it

Loving Nature Kay Milton, 2003-09-01 As the full effects of human activity on Earth's life support systems are revealed by science the question of whether we can change fundamentally our relationship with nature becomes increasingly urgent Just as important as an understanding of our environment is an understanding of ourselves of the kinds of beings we are and why we act as we do In *Loving Nature* Kay Milton considers why some people in Western societies grow up to be nature lovers actively concerned about the welfare and future of plants animals ecosystems and nature in general while others seem indifferent or intent on destroying these things Drawing on findings and ideas from anthropology psychology cognitive science and philosophy the author discusses how we come to understand nature as we do and above all how we develop emotional commitments to it Anthropologists in recent years have tended to suggest that our understanding of the world is shaped solely by the culture in which we live Controversially Kay Milton argues that it is shaped by direct experience in which emotion plays an essential role The author argues that the conventional opposition between emotion and rationality in western culture is a myth The effect of this myth has been to support a market economy which systematically destroys nature and to exclude from public decision making the kinds of emotional attachments that support more environmentally sensitive ways of living A better understanding of ourselves as fundamentally emotional beings could give such ways of living the respect they need

Desert in the Promised Land Yael Zerubavel, 2023-05-25 A complex and fascinating portrait of Israel an engaging book that combines anthropology culture and history Anita Shapira author of *Ben Gurion Father of Modern Israel* At once an ecological phenomenon and a cultural construction the desert has varied associations within Zionist and Israeli culture In the Judaic textual tradition it evokes exile and punishment yet is also a site for origin myths the divine presence and sanctity Secular Zionism developed its own spin on the duality of the desert as the romantic site of Jews biblical roots that inspired the Hebrew culture and as the barren land outside the Jewish settlements in Palestine featuring them as an oasis of order and technological progress within a symbolic desert Yael Zerubavel tells the story of the desert from the early twentieth century to the present shedding light on romantic mythical associations settlement and security concerns environmental sympathies and the commodifying tourist gaze Drawing on literary narratives educational texts newspaper articles tourist materials films popular songs posters

photographs and cartoons Zerubavel reveals the complexities and contradictions that mark Israeli society's semiotics of space in relation to the Middle East and the central role of the besieged island trope in Israeli culture and politics

The Everyday Naturalist Rebecca Lexa, 2025-06-17 Learn to identify animals plants and fungi wherever you go with this step by step guide for spotting and recording key traits and characteristics If you've ever consulted a field guide to identify a new bird at your feeder you

know the process isn't as easy as it sounds. In fact it seems like you have to know a lot about that mystery bird to even figure out where to start. *The Everyday Naturalist* fills in the gaps by explaining what traits to pay attention to when encountering a new species, how and when to use field guides, apps, and other resources, what to do if you get stuck, and more. Rather than focusing on one region or continent, these skills and tools are designed to help you classify nature anywhere you are, whether on familiar territory, traveling, or in a new home. In chapters about animals, plants, fungi, and organisms like lichens and slime molds, naturalist and guide Rebecca Lexa goes into detail about what sets each of these kingdoms apart from each other, from color, shape, and texture to reproductive characteristics, behavior, and habitat, and includes more than forty full-color photos and drawings to illustrate key points. She also provides detailed case studies to demonstrate how to use all of these traits to identify specimens across multiple kingdoms. This easy-to-follow guide empowers you to learn more about the species around you, then use what you know to preserve the world you love. And at a time when biodiversity is imperiled worldwide, nature needs more advocates than ever.

Loving Vampires Tom Pollard, 2016-03-14 Vampire characters are ubiquitous in popular culture, serving as metaphors for society's most sensitive subjects: sexuality, gender roles, race, ethnicity, class, and often channeling widespread fears of immigration, crime, terrorism, and addiction. This book explores pop culture's vampires variously as sexual seducers, savage monsters, noble protectors, and drainers of human power. The author discusses three real-life role models for vampire characters.

The Minimal Self: Psychic Survival in Troubled Times Christopher Lasch, 1985-10-17 Even more valuable than its widely praised predecessor *The Culture of Narcissism*, John W. Aldridge Faced with an escalating arms race, rising crime, and terrorism, environmental deterioration, and long-term economic decline, people have retreated from commitments that presuppose a secure and orderly world. In his latest book, Christopher Lasch, the renowned historian and social critic, powerfully argues that self-concern so characteristic of our time has become a search for psychic survival.
