**The Westminster Review**, 1899      **Creating White Australia** Jane Carey, Claire McLisky, 2009-11-16

The adoption of White Australia as government policy in 1901 demonstrates that whiteness was crucial to the ways in which the new nation of Australia was constituted And yet historians have largely overlooked whiteness in their studies of Australia's racial past Creating White Australia takes a fresh approach to the question of race in Australian history It demonstrates that Australia's racial foundations can only be understood by recognising whiteness too as race Including contributions from some of the leading as well as emerging scholars in Australian history it breaks new ground by arguing that whiteness was central to the racial ideologies that created the Australian nation This book pursues the foundations of white Australia across diverse locales It also situates the development of Australian whiteness within broader imperial and global influences As the recent apology to the Stolen Generations the Northern Territory Intervention and controversies over asylum seekers reveal the legacies of these histories are still very much with us today

At the end of World War II Britain possessed a vast African empire encompassing nearly 2.7 million square miles about 10 times larger than Britain itself But by 1965 only three small African territories remained under British control all of which would become independent before the end of 1968 This book examines the swift demise of Britain's African empire looking particularly at the role played by the United States in bringing the empire to an end It reveals how the United States was anti colonial without being actively pro independence concluding that the country's policies and actions combined with its postwar dominance directly and indirectly contributed to the political economic and social transformation of Africa
