Retaining Kohut's emphasis on the self and selfobject experience the book conceptualizes the therapeutic situation as a bi-directional field of needed and dreaded selfobject experiences of both patient and analyst. Through a rigorous application of the ISP model each chapter sheds light on the complex dynamic field within which self experience and selfobject experience of patient and analyst therapist unfold and are sustained. The ISP perspective allows the therapist to focus on the patient's strengths referred to as the Leading Edge without neglecting work with the repetitive transferences or Trailing Edge. This dual focus makes ISP a powerful agent for transformation and growth. Intersubjective Self Psychology provides a unified and comprehensive model of psychological life with specific practical applications that are clinically informative and therapeutically powerful.
