Entranced by Story Hugh Crago, 2014-04-24 We live in a world of stories yet few of us pause to ask what stories actually are why we consume them so avidly and what they do for story makers and their audiences This book focuses on the experiences that good stories generate feelings of purposeful involvement elevation temporary loss of self vicarious emotion and relief of tension The author examines what

drives writers to create stories and why readers fall under their spell why some children grow up to be writers and how the capacity for creating and comprehending stories develops from infancy right through into old age *Entranced by Story* applies recent research on brain function to literary examples ranging from the *Iliad* and *Wuthering Heights* to *Harold and the Purple Crayon* providing a groundbreaking exploration of the biological and neurological basis of the literary experience Blending research theory and biographical anecdote the author shows how it is the unique structure of the human brain with its layering of sophisticated cognitive capacities upon archaic emotion driven functions which best explains the mystery of story
