Rising India and Indian Communities in East Asia K Kesavapany, 2003-08-01 This edited volume containing thirty five chapters focuses on three main contemporary issues the phenomenon of the new Indian in the past five decades the impact of rising India on settled Indian communities and the recent migrants By examining these interrelated aspects this study seeks to address questions like what does the Rising India mean to Indian communities in East Asia How are members of Indian communities responding to India's rise Will India pay greater attention to people of Indian origin And last but not least will Indians in East Asia identify themselves with their ancestral land or view such identification as problematic

The Woman Patient Malkah Notman, 2013-11-11 This volume presents the knowledge views and experiences of experts in the fields of health care that are particularly important to women Not all of the authors agree on all of the issues but all share the same concerns about women's health and recognize the importance of providing information to enable women to become active participants in the health care partnership The idea for the book evolved from our own work in the field of women's health care The positive responses we received to several papers and presentations based on our experiences and addressed to patients physicians and other health care professionals indicated that there is a growing need for open discussion of women's health care issues as well as a need for developing and implementing new and better ways of dealing with these issues We were further motivated by the repeated failure of the health care community to integrate new insights and information that frequently contradict older established beliefs and practices into current health planning education and practice

The Routledge International Handbook of Global Therapeutic Cultures Daniel Nehring, Ole Jacob Madsen, Edgar Cabanas, China Mills, Dylan Kerrigan, 2020-08-24 The Routledge International Handbook of Global Therapeutic Cultures explores central lines of enquiry and seminal scholarship on therapeutic cultures popular psychology and the happiness industry Bringing together studies of therapeutic cultures from sociology anthropology psychology education politics law history social work cultural studies development studies and American Indian studies it adopts a consciously global focus combining studies of the psychologisation of social life from across the world Thematically organised it offers historical

accounts of the growing prominence of therapeutic discourses and practices in everyday life before moving to consider the construction of self identity in the context of the diffusion of therapeutic discourses in connection with the global spread of capitalism With attention to the ways in which emotional language has brought new problematisations of the dichotomy between the normal and the pathological as well as significant transformations of key institutions such as work family education and religion it examines emergent trends in therapeutic culture and explores the manner in which the advent of new therapeutic technologies the political interest in happiness and the radical privatisation and financialisation of social life converge to remake self identities and modes of everyday experience Finally the volume features the work of scholars who have foregrounded the historical and contemporary implication of psychotherapeutic practices in processes of globalisation and colonial and postcolonial modes of social organisation Presenting agenda setting research to encourage interdisciplinary and international dialogue and foster the development of a distinctive new field of social research The Routledge International Handbook of Global Therapeutic Cultures will appeal to scholars across the social sciences with interests in the advance of therapeutic discourses and practices in an increasingly psychologised society

The Politics of Child Sexual Abuse Nancy Whittier, 2011 The Politics of Child Sexual Abuse is the first study of activism against child sexual abuse tracing its emergence in feminist anti rape efforts its development into mainstream self help and its entry into mass media and public policy Nancy Whittier deftly charts the development of the movement s therapeutic politics demonstrating that activists viewed tactics for changing emotions and one s sense of self as necessary for widespread social change and combined them with efforts to change institutions and the state A lucid and moving account this book draws powerful lessons about the transformative potential of therapeutic politics their connection to institutions and the processes of incomplete social change that characterize American politics today

The Well-Being Project Jean Campbell, Ron Schraiber, In 1987 a groundbreaking survey called The Well Being Project was conducted by the California Network of Mental Health Clients under contract to the Office of Prevention of the California Department of Mental Health to explore what factors promote or deter the well being of those diagnosed labeled as mentally ill Initially it had been assumed that the analysis of the survey

data as well as the final written report would be awarded to a university or other professional research group. Much to the surprise of some and in the spirit of the disability rights movement rallying cry of nothing about us without us, the successful proposal was written by mental health client researchers Jean Campbell and Ron Schraiber on behalf of the California Network of Mental Health Clients. The study became known as The Well Being Project: Mental Health Clients Speak for Themselves and was published in 1989. Additionally, an award-winning documentary *People Say I'm Crazy* based on the study's findings was produced, as well as a compendium book to the video with the same title.

Communication and Disenfranchisement Eileen Berlin Ray, 2013-12-02. This volume and its companion case studies book deal with some of the people, groups, and classes who are living a disenfranchised existence in the United States. Whether through birth, life events, or unfortunate circumstances, they are denied full privileges, rights, and power within the existing societal structure. Centered around societal health problems as they relate to socioeconomic status, family abuse, and health concerns, these volumes examine salient issues from several theoretical frameworks, including feminist theory and the social construction of reality. *Communication and Disenfranchisement* provides theory-based essays on topics such as the homeless adult survivors of sexual assault, battered women, persons with disabilities, impoverished women, the indigent living in the inner city, persons with HIV/AIDS, the terminally ill, and the elderly. *Case Studies in Communication and Disenfranchisement* provides parallel case studies applying the issues and concepts discussed in the essays. Used together, these books provide theoretically based applications of social health issues within a communication framework. Traditionally, health communication research has emphasized the communication-physical health relationship. Inadvertently, this primary focus has restricted what information has been included under the domain of health communication. These books expand that domain by examining how the communication-disenfranchisement relationship is accomplished, managed, and overcome, and by recognizing the significance of the pragmatic and theoretic implications of this inquiry.

Science and Pseudoscience in Clinical Psychology, First Edition Scott O. Lilienfeld, Steven Jay Lynn, Jeffrey M. Lohr, 2012-02-21. This is the first major text designed to help professionals and students evaluate the merits of popular yet controversial practices in clinical psychology, differentiating those that can stand up to the rigors of science from those that cannot. Leading researchers review widely used therapies for alcoholism, infantile autism, ADHD, and posttraumatic stress disorder; herbal remedies for depression and anxiety; suggestive techniques for memory recovery; and self-help models. Other topics covered include issues surrounding psychological expert testimony, the uses of projective assessment techniques, and unanswered questions about dissociative identity disorder. Providing knowledge to guide truly accountable mental health practice, the volume also imparts critical skills for designing and evaluating psychological research programs. It is ideal for use in advanced undergraduate and graduate level courses in clinical psychology, psychotherapy, and evidence-based practice.
